Seducing Strangers Sep 16 2021 The author says it best: "This book is for people like you and me. People who go to work and—using words, pictures, music, and stories—are expected to make s**t happen . . . to make the phone lines light up and the in-box fill up. Attract fans, friends, and followers. Make the cash register ring. Win the business. Close the deal. Sell something." Joshua Weltman knows just how to do that, and teach others how to do it, too. An advertising creative director for more than 25 years and the Mad Men co-producer responsible for Don Draper's credibility as an advertising genius, Weltman distills everything he knows about the art of persuasion into a playbook?of rules, principles, insights, insider anecdotes, and more, all tailored to the fast-changing life in the information economy. Weltman identifies the four elements of selling—one of which is behind everything from a national television campaign to an email blast. There's the ad that makes people curious—want to know more? That creates a sense of urgency—limited time offer! That increases market share—why we're unique, or just better. And the ad that protects margins—thank you for your loyalty. And then Weltman explains how to employ these strategies, including: the six words that win business; the four kinds of stories; what to do if your product sucks; why lying in an ad will never pay off; why information reduces doubt; how to think like a force-multiplier; why different is better than better; why to remove jargon and acronyms and reveal ideas and relationships. Advertising, Joshua Weltman argues, is a toolbox, not a tool, and used right it makes people happy. Seducing Strangers shows you how. "People often ask me questions, or ask my opinions, on or about the world of advertising. My stock response is 'You know I play a fictional advertising executive, right?' That's usually used to cover the ignorance or stupidity of whatever I am about to say next. In the future I will simply refer them to Josh Weltman." —from the Foreword by Jon Hamm

Horse Anatomy for Performance Dec 27 2019 Examine the anatomy of a horse from an entirely different perspective. This intriguing and original explanation of the 11 internal body systems of horses shows them painted on the outside to describe everything on the inside. The horse is a highly sophisticated living organism so to enable him to reach his full athletic performance and give him a happy, healthy quality of life it is vital to understand both his capabilities and limitations within the context of his structure and function. Gillian Higgins turns her trademark technique of painting internal diagrams directly onto live horses to show how all the systems work, and work together, to influence performance and reduce the risk of injury. Divided into 12 chapters, Horse Anatomy for Performance combines high quality photographs and intricate paintings with top tips and fascinating facts to provide a practical and useful guide to horse anatomy. Visually appealing, original and easily understandable, the book explains how anatomy influences the way we manage, ride and train our horses. This book is a sequel to How Your Horse Moves by Gillian Higgins; together the books provide a comprehensive guide to horse anatomy in action "Finally a book where you can learn how your horse ticks - inside out - and it is easy to understand and fun to read. A must for every serious equestrian." --Dr W. Bechtolsheimer

When God Goes to Starbucks Oct 05 2020 More than ever, Christians are bombarded with tough faith questions from their pluralistic friends and neighbors. Many of these emerge as "anti-truth claims" and slogans we are all familiar with: • Why not just look out for yourself? • Do what you want--just as long as you don't hurt anyone • Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In When God Goes to Starbucks, he offers readers solid and caring Christian responses to these and many other concerns that are being discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today.

Komodo Dragons Aug 27 2022 More than twenty years have passed since Walter Auffenberg's monumental The Behavioral Ecology of the Komodo Monitor. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, "The species may well indeed survive in the wild for generations to come while countless other organisms are lost."

Designing and Evaluating Usable Technology in Industrial Research May 12 2021 This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research

The Irresistible Offer Jun 13 2021 Your customers are going to give you three seconds to make the sale. Do you know what to say in those three seconds? The marketing methods of the past are losing effectiveness as consumers are getting smarter and smarter and have less and less time. What is needed is a new way of doing business-a method that is simultaneously socially responsible and far more effective than "old" marketing. This new way is The Irresistible Offer. "The Irresistible Offer is the missing link in many marketing books." —Joe Sugarman, Chairman, BluBlocker Corporation "The Irresistible Offer reveals secret after proven secret guaranteed to pump fresh power into your sales process." —John Du Cane, CEO, Dragon Door Publications, Inc. "As the world's fastest reader (Guinness Book certified) I've read just about every business and marketing book in existence. The Irresistible Offer by Mark Joyner is, by far, the easiest and most powerful. If you want to make a profitable business (any business small or large), The Irresistible Offer should be your starting point." —Howard Berg, "The World's Fastest Reader" "I've read every book on marketing printed in the last 150 years. This is the first breakthrough in over fifty years." —Dr. Joe Vitale, author of The Attractor Factor "If I had to choose one modern marketing genius to learn from, it would be Mark Joyner. The Irresistible Offer belongs in the hands of everyone wanting to wildly succeed in business." —Randy Gilbert, a.k.a. "Dr. Proactive" host of The Inside Success Show

Developing Intelligent Agent Systems Sep 04 2020 Build your own intelligent agent system... Intelligent agent technology is a tool of modern computer science that can be used to engineer complex computer programmes that behave rationally in dynamic and changing environments. Applications range from small programmes that intelligently search the Web buying and selling goods via electronic commerce, to autonomous space probes. This powerful technology is not widely used, however, as developing intelligent agent software requires high levels of training and skill. The authors of this book have developed and tested a methodology and tools for developing intelligent agent systems. With this methodology (Prometheus) developers can start agent-oriented designs and implementations easily from scratch saving valuable time and resources. Developing Intelligent Agent Systems not only answers the questions "what are agents?" and "why are they useful?" but also the crucial question: "how do I design and build intelligent agent systems?" The book covers everything a practitioner needs to know to begin to effectively use this technology - including an introduction to the notion of agents, a description of the concepts involved, and a software engineering methodology. Read on for: a practical step-by-step introduction to designing and building intelligent agent systems. a full life-cycle methodology for developing intelligent agent systems covering specification, analysis, design and implementation of agents. PDT: Prometheus Design Tool – software support for the Prometheus design process. the example of an electronic bookstore to illustrate the design process throughout the book. Electronic resources including the Prometheus Design Tool (PDT), can be found at: http://www.cs.rmit.edu.au/agents/prometheus This book is aimed at industrial software developers, software engineers and at

advanced undergraduate students. It assumes knowledge of basic software engineering but does not require knowledge of Artificial Intelligence or of mathematics. Familiarity with Java will help in reading the examples in chapter 10.
