Ecotourists and field researchers alike have applauded this guide's compact size, light weight, and durability. More important, they have appreciated its clear and concise accounts of the mammals of this broad region. Each species account includes information on identifying characteristics, similar species, vocalizations, behavior and natural history, geographic range, conservation status, local names, and references to the scientific literature. In this completely revised and updated second edition: A total of 226 species are treated in full (206 were included in the first edition). All species accounts retained from the first edition have been updated to include the most recent research. All 195 maps showing the distribution and geographic range of each species have been revised to reflect the most

current information. Twenty-nine beautiful color plates illustrate more than 220 species (including significant color variants between males and females or adults and young). Seven black-and-white plates contain more than 60 images of individual species, mainly bats. A Field Guide to White Supremacy Jan 30 2020 Drawing explicit lines, across time and a broad spectrum of violent acts, to provide the definitive field guide for understanding and opposing white supremacy in America Hate, racial violence, exclusion, and racist laws receive breathless media coverage, but such attention focuses on distinct events that gain our attention for twenty-four hours. The events are presented as episodic one-offs, unfortunate but uncanny exceptions perpetrated by lone wolves, extremists, or individuals suffering from mental illness—and then the news cycle moves on. If we turn to scholars and historians for background and answers, we often find their knowledge siloed in distinct academic subfields, rarely connecting current events with legal histories, nativist insurgencies, or centuries of misogynist, anti-

Black, anti-Latino, anti-Asian, and xenophobic violence. But recent hateful actions are deeply connected to the past—joined not only by common perpetrators, but by the vast complex of systems, histories, ideologies, and personal beliefs that comprise white supremacy in the United States. Gathering together a cohort of researchers and writers, *A Field Guide to White Supremacy* provides much-needed connections between violence present and past. This book illuminates the career of white supremacist and patriarchal violence in the United States, ranging across time and impacted groups in order to provide a working volume for those who wish to recognize, understand, name, and oppose that violence. The Field Guide is meant as an urgent resource for journalists, activists, policymakers, and citizens, illuminating common threads in white supremacist actions at every scale, from hate crimes and mass attacks to policy and law. Covering immigration, antisemitism, gendered violence, lynching, and organized domestic terrorism, the authors reveal white supremacy as a motivating force in manifold parts of American life. The book also offers a sampling of some of the most recent scholarship in this area in order to spark broader conversations between journalists and their readers, teachers and their students, and activists and their communities. *A Field Guide to White Supremacy* will be an indispensable resource in paving the way for politics of alliance in resistance and renewal.

A Field Guide to Getting Lost Aug 07 2020 "An intriguing amalgam of personal memoir, philosophical speculation, natural lore, cultural history, and art criticism." —Los Angeles Times From the award-winning author of *Orwell's Roses*, a stimulating exploration of wandering, being lost, and the uses of the unknown. Written as a series of autobiographical essays, *A Field Guide to Getting Lost* draws on emblematic moments and relationships in Rebecca Solnit's life to explore issues of uncertainty, trust, loss, memory, desire, and place. Solnit is interested in the stories we use to navigate our way through the world, and the places we traverse, from wilderness to cities, in finding ourselves, or losing ourselves. While deeply personal, her own stories link up to larger stories, from captivity narratives of early Americans to the use of the color blue in Renaissance painting, not to mention encounters with tortoises, monks, punk rockers, mountains, deserts, and the movie *Vertigo*.
