The Going-concern-principle in Non-financial Disclosure Aug 26 2019 This book investigates the going-concern principle in the non-financial disclosure by companies in the international scenario proposing concepts and challenges to come. Following the main accounting literature, requirements and regulations, this book proposes the current state of the art in the non-financial disclosure, collecting main mandatory and voluntary frameworks and standards (e.g. European Directive 2014/95/UE on non-financial information, Global Reporting Initiative, International Integrated Reporting Council, Sustainability Accounting Standards Board, Climate Disclosure Standard Board, Carbon Disclosure Project, AA1000). This is a useful proposition for the investigation of the presence versus absence of the going concern in the sustainability and non-financial reports and disclosure by companies. Through a qualitative methodology, this book is intended to show the incidence of the going-concern in the non-financial disclosure and to what content and meaning it is referred. Several issues and characteristics of information provided to stakeholders are drafted.

Non-financial Disclosure and Integrated Reporting Oct 09 2020 The increasingly crucial role of companies non-financial disclosure (NFD) and integrated reporting (IR) has led to a lively debate among academics, practitioners, and regulators on the approaches, framework, contents, principles, and standards that should oversee these forms of reporting. Through several expert contributions, conducted both with qualitative and quantitative methodologies, this book provides an up-to-date portrait of the debate by exploring corporate NFD either in its mandated contents or voluntary information. Contributing authors provide studies that encompass the different lines of NFD, namely non-financial risk reporting, sustainability reporting, and intellectual capital reporting, as well as the integration of financial and non-financial information through IR, the assurance of the NFD and IR through auditing activities, and the role of management and CFOs in NFD and IR.

The Boundaries in Financial and Non-Financial Reporting Dec 11 2020 Although the need to expand the boundaries of financial reporting has been discussed since the mid-1990s, little consideration has been given to the evolution and discourses of integrated reporting of non-financial aspects. Yet by investigating how and why an organisation defines and its reporting boundaries, it is possible to understand what is truly "valued" (or not) in its business model. This innovative book reviews the guidelines and frameworks from the major relevant international organisations including: the International Accounting Standards Board, Global Reporting Initiative, Sustainability Accounting Standards Board, International Integrated Reporting Council, Carbon Disclosure Standards Board, and the World Intellectual Capital Initiative, and analyses their development and impact on the boundaries of financial and non-financial reporting. Illustrated with case studies and interviews with representatives of these organisations, this concise volume makes a significant contribution to the future of reporting theory and practice. It will be of great interest to advanced students, researchers, practitioners and policy makers.

Mandatory Non-financial Risk-Related Disclosure Jun 24 2019 This book focuses on the impact of the disclosure of non-financial risk, which could be seen as the most relevant non-financial information (NFI), in the aftermath of the 2014/95/EU Directive. The author analyses whether the switch from voluntary to mandatory NFI enhance the quality of disclosed NF risk-related information and the usefulness of the risk disclosure for investors. The book focuses specifically on the mandatory disclosure of non-financial (NF) risks as required by the EU Directive for listed Italian companies, investigating both the state of art of its disclosure and its usefulness for investors. In doing so, the book contributes to fill two relevant gaps in risk literature. The first research gap is related to the insufficient investigation of the disclosure of NF risks. Companies mandated to disclose risk-related information focused mainly on financial risks, in spite of the width of the definition of risk, conceived as information about any opportunity, danger, threat, or exposure that has or could impact the company in the future. The second gap is that empirical evidence about the effects of corporate risk disclosures is still limited, and the potential benefits of the disclosure of information on risks have not been fully explored. In particular, the relationship between risk disclosures and firm value is under researched, as the risk literature mainly focuses on the incentives question, related to the motives for which companies decide to disclose. The research in this book focuses on Italy, a country that provides a unique opportunity to examine the impact of mandatory NF risk disclosure on firm market value, being one of the biggest industrial European countries that had not mandatory legislation for NFI disclosure, and also one of the leading countries in voluntary corporate social responsibility (CSR) reporting at an international level. It has been carried out in the fiscal year 2017, the first year of the application of the mandatory NF disclosure for obliged Italian listed PIEs. The book contributes both to the measurement literature, as it presents a self-constructed quality NF risks and to the value relevance analysis literature, providing evidence of the usefulness of financial and non-financial risk-related disclosures in the Italian context.

The theory and techniques are presented with the non-financial manager in mind, and the theoretical material is supplemented by case studies and a discussion of the appropriateness of the various techniques and principles to solve practical problems. This book draws from examples and practice around the world, helping students of international corporate finance, particularly non-specialist finance students, understand the complexities of modern Europe and comparative systems of finance globally. International Finance is essential reading for anyone studying international finance or needing an up-to-date, engaging resource to help them navigate the complicated and ever-changing global financial world. Key theories and terms are explained and defined, avoiding unnecessary jargon and acknowledging that many readers are coming to the subject with little or no prior knowledge of corporate finance at all. Online supporting resources include PowerPoint lecture slides.
