[Faulkner's Sexualities](#) Feb 22 2022 William Faulkner grew up and began his writing career during a time of great cultural upheaval, especially in the realm of sexuality, where every normative notion of identity and relationship was being re-examined. Not only does Faulkner explore multiple versions of sexuality throughout his work, but he also studies the sexual dimension of various social, economic, and aesthetic concerns. In *Faulkner's Sexualities*, contributors query Faulkner's life and fiction in terms of sexual identity, sexual politics, and the ways in which such concerns affect his aesthetics. Given the frequent play with sexual norms and practices, how does Faulkner's fiction constitute the sexual subject in relation to the dynamics of the body, language, and culture? In what ways does Faulkner participate in discourses of masculinity and femininity, desire and reproduction, heterosexuality and homosexuality? In what ways are these discourses bound up with representations of race and ethnicity, modernity and ideology, region and nation? In what ways do his texts touch on questions concerning the racialization of categories of gender within colonial and dominant metropolitan discourses and power relations? Is there a Southern sexuality? This volume

wrestles with these questions and relates them to theories of race, gender, and sexuality.

Dynamic Mars Mar 26 2022 Dynamic Mars: Recent and Current Landscape Evolution of the Red Planet presents the latest observations, interpretations, and explanations of geological change at the surface or near-surface of this terrestrial body. These changes raise questions about a decades-old paradigm, formed largely in the aftermath of very coarse Mariner-mission imagery in the 1960s, suggesting that much of the interesting geological activity on Mars occurred deep in its past, eons ago. The book includes discussions of (1) Mars' ever-changing atmosphere and the impact of this on the planet's surface and near-surface; (2) the possible involvement of water in relatively new, if not contemporary, gully-like flows and slope streaks (i.e. recurring slope lineae); and (3) the identification of a broad suite of agents and processes (i.e. glacial, periglacial, aeolian, meteorological, volcanic, and meteoric) that are actively revising surface and near-surface landscapes, landforms, and features on a local, regional, and hemispheric scale. Highly illustrated and punctuated by data from the most recent Mars missions, Dynamic Mars is a valuable resource for all levels of research in the geological history of Mars, as well as of the three other terrestrial planets. Utilizes observational and model-based data as well as geological context to frame the understanding of the dynamic surface and near-surface of Mars Presents a broad spectrum of highly regarded experts and themes to discuss and evaluate the geological history of late and current Mars Includes extensive and detailed imagery to clearly illustrate these themes, discussions, and evaluations

European Literature and Theology in the Twentieth Century Nov 09 2020 The central themes of this collection of essays are the mystery of time past, present and future, and the problem of redemption. They are concerned with modern literature, with the threat of meaninglessness in the postmodern condition, and with the possibility of salvation. In an age of deferral and difference, this book addresses itself to eschatology and apocalypse, and redemption in, through, but particularly of, time itself. Hell and madness are never far away, yet the refiguration of time and the breaking in of the transcendent continue to suggest theological possibilities beyond the wastelands of the twentieth century. To those possibilities we look in hope.
