Brand Communities for Fast Moving Consumer Goods Oct 10 2020 Do brand communities really work for FMCG? Can consumers involved in brand communities be characterized by specific behavioral attributes? Are there significant differences between members and those consumers who are simply visiting the brand-community site? And do the members show a higher level of customer retention as those non-member? In her study Sandra Meister derives a set of behavioral attributes relevant for brand-community members. By means of a significance test and a structural equation model, she examines the behavioral profile of brand-community members and compares the results with brand-community non-members. Additionally, she investigates the impact of the behavioral attributes on the performance measure 'customer retention'. Finally, she formulates leanings and recommendation for brand-community management.

Save Yourself Apr 15 2021 This "hilarious and honest" bestselling memoir from a rising comedy star tackles issues of gender, sexuality, feminism, and the Catholic childhood that prepared her for a career as an outspoken lesbian comedian (Abby Wambach). Cameron Esposito wanted to be a priest and ended up a stand-up comic. Now she would like to tell the whole queer as hell story. Her story. Not the sidebar to a straight person's rebirth-she doesn't give a makeover or plan a wedding or get a couple back together. This isn't a queer tragedy. She doesn't die at the end of this

book, having finally decided to kiss the girl. It's the sexy, honest, bumpy, and triumphant dyke's tale her younger, wasn't-allowed-to-watch-Ellen self needed to read. Because there was a long time when she thought she wouldn't make it. Not as a comic, but as a human. SAVE YOURSELF is full of funny and insightful recollections about everything from coming out (at a Catholic college where sexual orientation wasn't in the nondiscrimination policy) to how joining the circus can help you become a better comic (so much nudity) to accepting yourself for who you are-even if you're, say, a bowl cut-sporting, bespectacled, gender-nonconforming child with an eye patch (which Cameron was). Packed with heart, humor, and cringeworthy stories anyone who has gone through puberty, fallen in love, started a career, or had period sex in Rome can relate to, Cameron's memoir is for that timid, fenced-in kid in all of us-and the fearless stand-up yearning to break free. Snake Bite Nov 30 2019 Investigating the poisonings of three men from different regions of Shanghai who were bitten by the same snake, Sherlock discovers unsettling ties to a plot to blow up an American warship. By the author of *The Bond Files*.

The English And Sex Oct 29 2019 Is there a particular English attitude to sex? What makes it? Is it good? Is it bad? How has it changed? And what of the future? When it comes to our sexual instincts, much more than in any other field of human activity, the importance of our psychological heritage is paramount. This book suggests that there is both confusion and constraint, aggravated by grey skies and a rapidly developing multiracial society - compounded by an uneven historical, cultural, religious and educational background. Richard Goodall reviews English sexual trends from the 17th century to the first decade of the third millennium, citing the most recent statistical data. The reader will be surprised by some of his conclusions.

Book includes bibliographical references and an index.

The Madness of Grief May 05 2020 THE SUNDAY TIMES BESTSELLER 'Immensely moving and disarmingly witty' Nigella Lawson 'Such a moving, tough, funny, raw, honest read' Matt Haig 'Beautifully written, moving and gut-wrenching, but also at times very funny' Ian Rankin 'Captures brilliantly, beautifully, bravely the comedy as well as the tragedy of bereavement' The Times 'Will strike a chord with anyone who has grieved' Independent Whether it is pastoral care for the bereaved, discussions about the afterlife, or being called out to perform the last rites, death is part of the Reverend Richard Coles's life and work. But when his partner the Reverend David Coles died, shortly before Christmas in 2019, much about death took Coles by surprise. For one thing, David's death at the early age of forty-three was unexpected. The man that so often assists others to examine life's moral questions now found himself in need of help. He began to look to others for guidance to steer him through his grief. The flock was leading the shepherd. Much about grief surprised him: the volume of 'sadmin' you have to do when someone dies, how much harder it is travelling for work alone, even the pain of typing a text message to your partner - then realising you are alone. The Reverend Richard Coles's deeply personal account of life after grief will resonate, unforgettably, with anyone who has lost a loved one.

Genetic Technology and Food Safety Jun 29 2022 The volume gives an overview on how legislators all over the world have come up with different legal solutions for governing genetically modified organisms (GMOs) and food security and provides a compact summary of the existing regulations in this field. In a comparative legal approach, a general report analyses and compares these various national and supranational legal systems. It closely follows the newest developments at the interface between genetic engineering law and food law. The emergence of a new technology usually leads to

fundamental questions as to how the law should respond to it. The regulation of genetically modified organisms is a prime example, they have been discussed controversially ever since they were subject of legislation and regulation. In particular, this applies to the use of GMOs in food production. There is a variety of interesting legislations and a differentiated width of legal frameworks on international, supranational (EU) and national level to be found. The different regulations that thereby came to light are evidence of the various opinions and policies the societies and states have developed on this matter. It is this variety of regulations the volume examines, primarily on the basis of national reports that were handed in concerning the topic of genetic technology and food security at the occasion of the XIX International Congress of Comparative Law.

German Special Operations In The 1944 Ardennes Offensive Oct 02 2022 This study is a historical analysis of the German special operations conducted in support of their overall Ardennes offensive. It focuses on the two major special operations of the German offensive, Operations "Greif" and "Stoesser." Operation Greif was the German attempt to infiltrate a commando unit behind American lines disguised as American soldiers. Operation Stoesser, the last German airborne operation of the war, was designed to secure a key cross-roads behind American lines. These special operations failed because of faulty planning, inadequate preparation, and a lack of coordination between the special and conventional forces. These problems, exacerbated by a lack of preparation time, resulted in a pair of ad-hoc units that were unable to accomplish their primary missions, although the operations were characterized by boldness, initiative, and improvisation. This study also examines the strategic setting, planning, preparations, and conduct of these operations, as well as their impact on the overall campaign. This study also examines the key lessons-learned that can be derived from both operations. Lastly, the study explores the implications of these lessons for the U.S. military of today.

The Grimm Conclusion Sep 28 2019 From Newbery Honor-winning, New York Times bestselling author Adam Gidwitz Cover may vary Did you know that Cinderella's stepsisters got their eyes pecked out by birds? Really. And that Rumpelstiltskin ripped himself in half? And that in "The Mouse, the Bird, and the Sausage," a mouse, a bird, and a sausage all talk to each other? (Okay, I guess that one's not that grim.) Those are the real fairy tales. But they have nothing on the fairy tales in this book. For more twisted tales look for A Tale Dark and Grimm and In a Glass Grimly. * "Underneath the gore, the wit, and the trips to Hell and back, this book makes it clearer than ever that Gidwitz truly cares about the kids he writes for." —Publishers Weekly starred review "Entertaining story-mongering, with traditional and original tropes artfully intertwined."—Kirkus Reviews "As innovative as they are traditional, the stories maintain clear connections with traditional Grimm tales while creatively connecting to the narrative, and all the while keeping the proceedings undeniably grisly and lurid. . . .Readers will rejoice."—School Library Journal

Campbell International Food and Beverage Sep 08 2020 Based on the bestselling series from The Great Courses, Building Great Sentences celebrates the sheer joy of language--and will forever change the way you read and write. Great writing begins with the sentence. Whether it's two words ('Jesus wept.') or William Faulkner's 1,287-word sentence in Absalom! Absalom!, sentences have the power to captivate, entertain, motivate, educate, and, most importantly, delight. Yet the sentence-oriented approach to writing is too often overlooked in favor of bland economy. Building Great Sentences teaches you to write better sentences by luxuriating in the pleasures of language. Award-winning Professor Brooks Landon draws on examples from masters of long, elegant sentences--including Don DeLillo, Virginia Woolf, Joan Didion, and Samuel Johnson--to reveal the mechanics of how language works on thoughts and emotions, providing the tools to write powerful, more effective sentences. 'The most erudite, readable book anyone has ever written on the sentence.' Adrian Blevins, associate professor of English, Colby College 'An Elements of Style for the prodigious. Building Great Sentences is a service to writers and a joy to read.' R. M. Berry, professor, Florida State University www.thegreatcourses.com
