Health Care Advocacy Nov 05 2022 Interest in policy influences on health care is high, and will remain high as long as health care costs continue to rise and health care reform remains a hot topic in the news. advocate for system changes. Clinicians and Health Care Advocacy is written by clinicians for clinicians and focuses on how policy works and what individual professionals can do to affect policy. It looks at the facts and processes in an accessible way that employs case-based examples of clinician advocacy to illustrate its points. The book is nonpartisan and will stay neutral on preferences for one public policy solution versus another (single payer vs. market reform, for example). Instead, it encourages a model of clinicians as responsible for healing not only the individual patient but also the larger health care system in which they work.
