Latinos and American Law Dec 14 2020 To achieve justice and equal protection under the law, Latinos have turned to the U.S. court system to assert and defend their rights. Some of these cases have reached the United States Supreme Court, whose rulings over more than a century have both expanded and restricted the legal rights of Latinos, creating a complex terrain of power relations between the U.S. government and the country's now-largest ethnic minority. To map this legal landscape, Latinos and American Law examines fourteen landmark Supreme Court cases that have significantly affected Latino rights, from *Botiller v. Dominguez* in 1889 to *Alexander v. Sandoval* in 2001. Carlos Soltero organizes his study chronologically, looking at one or more decisions handed down by the Fuller Court (1888-1910), the Taft Court (1921-1930), the Warren Court (1953-1969), the Burger Court (1969-1986), and the Rehnquist Court (1986-2005). For each case, he opens with historical and legal background on the issues involved and then thoroughly discusses the opinion(s) rendered by the justices. He also offers an analysis of each decision's significance, as well as subsequent developments that have affected its impact. Through these case studies, Soltero demonstrates that in dealing with Latinos over issues such as education, the administration of criminal justice, voting rights, employment, and immigration, the Supreme Court has more often mirrored, rather than led, the attitudes and politics of the larger U.S. society.

Language, Ideology and Education Jan 03 2020 This book examines the role textbooks play in the teaching of dominant and non-dominant (first and foreign) languages in a range of cultural contexts worldwide. Each chapter addresses important issues related to what constitutes "legitimate knowledge", the politics of learning materials, global cultural awareness, competing ideologies, and the development of multilingual literacies. Language, Ideology and Education: The Politics of Textbooks in Language Education comprehensively surveys theoretical perspectives and methodological issues in the critical examination of language textbooks. In particular, it looks at: The Cultural Politics of Language Textbooks in the Era of Globalization The Politics of Instructional Materials for English for Young Learners Ideological Tensions and Contradictions in Lower Primary English Teaching Materials in Singapore Creating a Multilingual/multicultural Space in Japanese EFL: A Critical Analysis of Discursive Practices within a New Language Education Policy The book is primarily addressed to those who teach and research in the areas of Foreign Language Education, TESOL, Applied Linguistics, Language Policy, Critical Pedagogy, and Textual Cultures. Although the book is focused on textbook and materials analysis, rather than evaluation, most chapters discuss implications for curriculum design and materials development and therefore will be relevant to scholars working in those fields.

Lecturas literarias: Moving Toward Linguistic and Cultural Fluency Through Literature Apr 17 2021 Lecturas literarias shares same methodology, design, icons, and so forth as Punto y aparte. Each reading is accompanied by pre- and post-reading activities as well as by role-playing, creative-writing, and other follow-up activities that students can use to expand on the themes presented in each reading. Students are exposed to literary terminology. With each reading, a different aspect of literary analysis is presented (e.g., the use of dialogue, tone, narrative voice). Students are then asked to apply this new knowledge in a deeper analysis of the reading as a creative work.

The Longest Game Mar 05 2020 On September 10, 1984, Anatoly Karpov and Garry Kasparov appeared on the stage of the Hall of Columns in Moscow for the first game of their match for the World Chess Championship. The clash between the reigning champion and his brazen young challenger was highly anticipated, but no one could have foreseen what was in store. In the next six years they would play five matches for the highest title and create one of the fiercest rivalries in sports history. The matches lasted a staggering total of 14 months, and the 'two K's' played 5540 moves in 144 games. The first match became front page news worldwide when after five months FIDE President Florencio

Campomanes stepped in to stop the match citing exhaustion of both participants. A new match was staged and having learned valuable lessons, 22-year-old Garry Kasparov became the youngest World Chess Champion in history. His win was not only hailed as a triumph of imaginative attacking chess, but also as a political victory. The representative of 'perestroika' had beaten the old champion, a symbol of Soviet stagnation. Kasparov defended his title in three more matches, all of them full of drama. Karpov remained a formidable opponent and the overall score was only 73-71 in Kasparov's favour. In The Longest Game Jan Timman returns to the Kasparov-Karpov matches. He chronicles the many twists and turns of this fascinating saga, including his behind-the-scenes impressions, and takes a fresh look at the games.

The Origin of the Checkers and Modern Chess Game. Volume II Dec 02 2019 This book, Volume II, at this moment is one of the most profound, rigorous and well-documented investigations ever into the history of draughts or chess. In this monumental work, around one thousand books dealing with history, bibliography, technical treatises, literature, general culture, etc. were carefully studied and referenced. The intersection between the games of chess and draughts was much greater than was first thought, as the present research demonstrates. And as could not be otherwise: with the work and cooperation of one of the all-time great figures of the history of draughts and a chess historian specialized in the medieval and renaissance period and technical bibliography, everything would out. Indeed, a solid foundation on which to accommodate a truth that had so fiercely resisted the light of day. If this were not the case, without this team work, a lot, and maybe too much, time would have gone by until everything would have finally settled into its rightful place.

The Sun on My Head Nov 24 2021 A bestselling literary sensation in Brazil, a powerful debut short-story collection about favela life in Rio de Janeiro In The Sun on My Head, Geovani Martins recounts the experiences of boys growing up in the favelas of Rio de Janeiro in the early years of the twenty-first century. Drawing on his childhood and adolescence, Martins uses the rhythms and slang of his neighborhood dialect to capture the texture of life in the slums, where every day is shadowed by a ubiquitous drug culture, the constant threat of the police, and the confines of poverty, violence, and racial oppression. And yet these are also stories of friendship, romance, and momentary relief, as in "Rolézim," where a group of teenagers head to the beach. Other stories, all uncompromising in their realism and yet diverse in narrative form, explore the changes that occur when militarized police occupy the favelas in the lead-up to the World Cup, the cycles of violence in the narcotics trade, and the feelings of invisibility that define the realities of so many in Rio's underclass. The Sun on My Head is a work of great talent and sensitivity, a daring evocation of life in the favelas by a rising star rooted in the community he portrays.

Billiards at Half-Past Nine Oct 24 2021 Böll's well-known opposition to fascism and war informs this moving story of a single day in the life of traumatized soldier Robert Faehmel, scion of a family of successful Cologne architects, as he struggles to return to ordinary life after the Second World War. Cultural Techniques Mar 17 2021 In a crucial shift within posthumanistic media studies, Bernhard Siegert dissolves the concept of media into a network of operations that reproduce, displace, process, and reflect the distinctions fundamental for a given culture. Cultural Techniques aims to forget our traditional understanding of media so as to redefine the concept through something more fundamental than the empiricist study of a medium's individual or collective uses or of its cultural semantics or aesthetics. Rather, Siegert seeks to relocate media and culture on a level where the distinctions between object and performance, matter and form, human and nonhuman, sign and channel, the symbolic and the real are still in the process of becoming. The result is to turn ontology into a domain of all that is meant in German by the word Kultur. Cultural techniques comprise not only self-referential symbolic practices like reading, writing, counting, or image-making. The analysis of artifacts as cultural techniques emphasizes their ontological status as "in-betweens," shifting from firstorder to second-order techniques, from the technical to the artistic, from object to sign, from the natural to the cultural, from the operational to the representational. Cultural Techniques ranges from seafaring, drafting, and eating to the production of the sign-signal distinction in old and new media, to the reproduction of anthropological difference, to the study of trompe-l'oeils, grids, registers, and doors. Throughout, Siegert addresses fundamental questions of how ontological distinctions can be replaced by chains of operations that process those alleged ontological distinctions within the ontic. Grounding posthumanist theory both historically and technically, this book opens up a crucial dialogue between new German media theory and American postcybernetic discourses.

The Important Book Nov 12 2020 The important thing about The Important Book -- is that you let your child tell you what is important about the sun and the moon and the wind and the rain and a bug and a bee and a chair and a table and a pencil and a bear and a rainbow and a cat (if he wants to). Tal-Botvinnik 1960 Oct 12 2020 One of the greatest books ever written about a world championship match. In 1960 Mikhail Botvinnik was the pillar of "scientific" chess and the ironwilled champion of the world. The young attacking genius Mihail Tal, the "Wizard of Riga," put the magic back into the game by defeating Botvinnik with spectacular tactics in one of the most dramatic and celebrated world championship matches of all time. This is Tal's own classic work on the contest. In it he sets the stage and explains every one of the 21 games, telling both the on- and off-the-board story of this titanic clash of styles and thought. Take a trip with the Magician from Riga as he invites you to share his thoughts and feelings as he does battle for the world title. "Mikhail Tal's splendid account of his world championship match victory is one of the masterpieces of the golden age of annotation - before insights and feelings and flashes of genius were reduced to mere moves and informant symbols. This is simply the best book written about a world championship match by a contestant. That shouldn't be a surprise because Tal was the finest writer to become world champion." - From the Foreword by International Grandmaster Andy Soltis

Activist Scholarship Jul 29 2019 Can scholars generate knowledge and pedagogies that bolster local and global forms of resistance to U.S. imperialism, racial/gender oppression, and the economic violence of capitalist globalization? This book explores what happens when scholars create active engagements between the academy and communities of resistance. In so doing, it suggests a new direction for antiracist and feminist scholarship, rejecting models of academic radicalism that remain unaccountable to grassroots social movements. The authors explore the community and the academy as interlinked sites of struggle. This book provides models and the opportunity for critical reflection for students and faculty as they struggle to align their commitments to social justice with their roles in the academy. At the same time, they explore the tensions and challenges of engaging in such contested work.

Antibiotics and Bacterial Resistance Oct 31 2019 The need for novel antibiotics is greater now than perhaps anytime since the pre-antibiotic era. Indeed, the recent collapse of many pharmaceutical antibacterial groups, combined with the emergence of hypervirulent and pan-antibiotic-resistant bacteria has severely compromised infection treatment options and led to dramatic increases in the incidence and severity of bacterial infections. This collection of reviews and laboratory protocols gives the reader an introduction to the causes of antibiotic resistance, the bacterial strains that pose the largest danger to humans (i.e., streptococci, pneumococci and enterococci) and the antimicrobial agents used to combat infections with these organisms. Some new avenues that are being investigated for antibiotic development are also discussed. Such developments include the discovery of agents that inhibit bacterial RNA degradation, the bacterial ribosome, and structure-based approaches to antibiotic drug discovery. Two laboratory protocols are provided to illustrate different strategies for discovering new antibiotics. One is a bacterial growth inhibition assay to identify inhibitors of bacterial growth that specifically target conditionally essential enzymes in the pathway of interest. The other protocol is used to identify inhibitors of bacterial cell-to-cell signaling. This e-book - a curated collection from eLS, WIRES, and Current Protocols - offers a fantastic introduction to the field of antibiotics and antibiotic resistance for students or interdisciplinary collaborators. Nuestra América Jun 27 2019 NAMED A MOST ANTICIPATED BOOK OF THE YEAR BY KIRKUS REVIEWS A riveting study of the intersections between Jewish and Latin American culture, this immigrant family memoir recounts history with psychological insight and the immediacy of a thriller. In Nuestra América, eminent anthropologist and historian Claudio Lomnitz traces his grandparents' exile from Eastern Europe to South America. At the same time, the book is a pretext to explain and analyze the worldview, culture, and spirit of countries such as Peru, Colombia, and Chile, from the perspective of educated Jewish emigrants imbued with the hope and determination typical of those who escaped Europe in the 1920s. Lomnitz's grandparents, who were both trained to defy ghetto life with the pioneering spirit of the early Zionist movement, became intensely involved in the Peruvian leftist intellectual milieu and its practice of connecting Peru's indigenous past to an emancipatory internationalism that included Jewish culture and thought. After being thrown into prison supposedly for their socialist leanings, Lomnitz's grandparents were exiled to Colombia, where they were subject to its scandals, its class system, its political life. Through this lens, Lomnitz explores the almost negligible attention and esteem that South America holds in US public opinion. The story then continues to Chile during World War II, Israel in the 1950s, and finally to Claudio's youth, living with his parents in Berkeley, California, and Mexico City.

A Comprehensive scope and sequence: The comprehensive scope and sequence allows instructors to choose what to cover throughout the course without having to supplement their own materials to fill gaps present in other texts. Carefully arranged organization: the overall organization carefully progresses from formulaic expressions to vocabulary and grammar relevant to daily life and personal interests (studies, family, home, leisure activities), then goes on to prepare students for survival situations (ordering a meal, traveling), and finally branches out to broader themes (current events, social and environment issues). This forward progress is reinforced by a cyclical structure where vocabulary, grammar, and language functions are continuously reviewed and recycled. Clear and effective vocabulary and grammar presentations: Puntos' approach to vocabulary and grammar focuses on the acquisition of vocabulary during the early stages of language learning and then at the start of each chapter throughout the text. Grammar is introduced in thorough explanations, with careful attention given to skills development rather than grammatical knowledge alone. These explanations are now even more accessible to students, featuring conversational language, increased clarity, additional examples, and organization of complex, dense explanations into manageable chunks of concise grammar summary. Integrated four-skills approach: Puntos carefully sequences activities, moving students from controlled to free-form tasks. In the tenth edition, this overall scaffolding is improved and introduced at the individual activity level. Starting with the very first activity fol
