Security Expertise May 29 2022 This volume brings together scholars from different fields to explore the power, consequences and everyday practices of security expertise. Expertise mediates between different forms of knowledge: scientific and technological, legal, economic and political knowledge. This book offers the first systematic study of security expertise and opens up a productive dialogue between science and technology studies and security studies to investigate the character and consequences of this expertise. In security theory, the study of expertise is crucial to understanding whose knowledge informs security making and to reflect on the impact and responsibility of security analysis. In science and technology studies, the study of security politics adds a challenging new case to the agenda of research on expertise and policy. The contributors investigate cases such as academic security studies, security think tanks, the collaboration between science, anthropology and the military, transnational terrorism, and the ethical consequences of security expertise. Together they challenge our understanding of how expertise works and what consequences it has for security politics and international relations. This book will be of particular interest to students of critical security studies, sociology, science and technology studies, and IR/security studies in general.

Understanding Revelations by Astronomy May 05 2020 The vision of Saint John the Divine, in Revelations XII, has very specific images; beside the first appearance of the Dragon with seven heads. There is also; the woman with the crown, the man child with the rod of iron, the serpent's tail casting stars to the earth, the eagle's wing, . and also the 1260 days. All of these are clues about how astronomy and its precession of the equinoxes is used to pin point the very year, month, and day for the birth of the Second Coming of Christ on Earth; before He returns from heaven with the host of 10,000. Knowledge of the Galactic Alignment was hidden in metaphors for Christianity. 7&7 was the symbol for the 25,920 year Precessional Cycle & our current Alignment creates once in infinity Sacred Geometry. The entire stellar event goes far beyond the conjunction of the Galactic Center & December Solstice Sun that 2012 is famous for. The book, Hamlet's Mill, shows that Precessional Cosmology was encoded as math & metaphoric symbols, into mythos of many cultures, during the Neolithic Revolution, until Saint John's Revelations. The ancient, world-wide priesthoods felt it was important enough to pass down this secret about the Galactic Alignment, which was to bring forth the expected Messiah. But... This could only be learned after thousands of years of astronomical observation. The 7&7 motif is in many cultures cosmology of heaven. In ancient Mesopotamian mythos; The Huluppu Tree, Gilgamesh's Axe of 7 talents and 7 minas, fells the tree. Inanna/Ishtar dances passed 7 gates, leaving 7 objects; to enter the land of the dead. In the Bible; Pharaoh dreamed about 7 years of plenty & 7 years of famine. Jacob worked 7 years for Leah & 7 for Rachel. The 7&7 is all through the Prophecy of St. John, the Divine Revelator. In Sacred Geometry, the 7 & 14 divisions of a circle use 1/7th & 2/7th, to create the Circled-Square & the Cubed-Sphere (probably Masonic Lost Lore). Ancient mathematicians, like the Pythagorean's, considered those to be the perfect expression of reality. The 2/7th angle occurs during 'our' Galactic Alignment in several ways. There is a 4-3-4-3 'X' shape of the Ecliptic Axis & Galactic Axis, sighted down the Earth's Celestial Pole. This hemisphere star chart, also shows a 4-3-4-3 'X' with the Equinoxes & crossing of the Galactic Equator with the Celestial Equator. The hemisphere chart also makes a 14-fold, 5-4-5 trine. This marks the sacred 260-day Tzolkin Calendar from Mesoamerica. The 5-4-5 trine & 260 days is found in the beginning of Genesis; & also, in Revelations, with the Beast & Dragon. The true revelation is more than we're in this special era right now. It's more than the fact that these ancient astronomers had Precessional Cosmology figured out, to its most inner workings. The true revelation, is that this was a sharing of knowledge, in a vast global-cultural phenomenon, encoding the Fugue and Precession. into mythos, & passed down the ages... And that it is known and used today.

The SAGE Handbook of the History, Philosophy and Sociology of International Relations Oct 10 2020 The SAGE Handbook of the History, Philosophy and Sociology of International Relations offers a panoramic overview of the broad field of International Relations by integrating three distinct but interrelated foci. It retraces the historical development of International Relations (IR) as a professional field of study, explores the philosophical foundations of IR, and interrogates the sociological mechanisms through which scholarship is produced and the field is structured. Comprising 38 chapters from both established scholars and an emerging generation of innovative meta-theorists and theoretically driven empiricists, the handbook fosters discussion of the field from the inside out, forcing us to come to grips with the widely held perception that IR is experiencing an existential crisis quite unlike anything else in its hundred-year history. This timely and innovative reference volume reflects on situated scholarly practices in a way that projects our collective thinking into the future. The Higher Power of Mind and Spirit Jul 19 2021 One of the supreme essentials of all successful living is to strike the right balance in life. This book helps determine our inner, outer & soul physical universes with sheer precision. Ralph Waldo Trine was a philosopher, mystic, teacher and author of many books, and was one of the early mentors of the New Thought Movement. His writings had a great influence on many of his contemporaries including Ernest Holmes, founder of Religious Science. He was a true pioneer in the area of life-transforming thought. No other New Thought author has sold more books than he, his writings reaching far beyond New Thought circles out to the general public, which has bought and read Trine's books without ever knowing that they were New Thought.

IN TUNE WITH THE INFINITE FULLNESS OF PEACE, POWER, AND PLENTY Oct 29 2019 There is a golden thread that runs through every religion in the world. There is a golden thread that runs through the lives and the teachings of all the prophets, seers, sages, and saviours in the world's history, through the lives of all men and women of truly great and lasting power. All that they have ever done or attained to has been done in full accordance with law. What one has done, all may do. This same golden thread must enter into the lives of all who today, in this busy work-a-day world of ours, would exchange impotence for power, weakness and suffering for abounding health and strength, pain and unrest for perfect peace, poverty of whatever nature for fullness and plenty. Each is building his own world. We both build from within and we attract from without. Thought is the force with which we build, for thoughts are forces. Like builds like and like attracts like. In the degree that thought is spiritualized does it become more subtle and powerful in its workings. This spiritualizing is in accordance with law and is within the power of all. Everything is first worked out in the unseen before it is manifested in the seen, in the ideal before it is realized in the real, in the spiritual before it shows forth in the material. The realm of the unseen is the realm of cause. The realm of the seen is the realm of effect. The nature of effect is always determined and conditioned by the nature of its cause. To point out the great facts in connection with, and the great laws underlying the workings of the interior, spiritual, thought forces, to point them out so simply and so clearly that even a child can understand, is the author's aim. To point them out so simply and so clearly that all can grasp them, that all can take them and infuse them into every-day life, so as to mould it in all its details in accordance with what they would have it, is his purpose. That life can be thus moulded by them is not a matter of mere speculation or theory with him, but a matter of positive knowledge. There is a divine sequence running throughout the universe. Within and above and below the human will incessantly works the Divine will. To come into harmony with it and thereby with all the higher laws and forces, to come then into league and to work in conjunction with them, in order that they can work in league and in conjunction with us, is to come into the chain of this wonderful sequence. This is the secret of all success. This is to come into the possession of unknown riches, into the realization of undreamed-of powers.

Translations of Security Jun 25 2019 This book scrutinizes how contemporary practices of security have come to rely on many

different translations of security, risk, and danger. Institutions of national security policies are currently undergoing radical conceptual and organizational changes, and this book presents a novel approach for how to study and politically address the new situation. Complex and uncertain threat environments, such as terrorism, climate change, and the global financial crisis, have paved the way for new forms of security governance that have profoundly transformed the ways in which threats are handled today. Crucially, there is a decentralization of the management of security, which is increasingly handled by a broad set of societal actors that previously were not considered powerful in the conduct of security affairs. This transformation of security knowledge and management changes the meaning of traditional concepts and practices, and calls for investigation into the many meanings of security implied when contemporary societies manage radical dangers, risks and threats. It is necessary to study both what these meanings are and how they developed from the security practices of the past. Addressing this knowledge gap, the book asks how different ideas about threats, risk, and dangers meet in the current practices of security, broadly understood, and with what political consequences. This book will be of interest to students of critical security studies, anthropology, risk studies, science and technology studies and International Relations. In the Hollow of His Hand Jan 01 2020 Organized Christianity-many of its principles and doctrines "formulated by pre-medieval minds, on pre-medieval knowledge"-is not suitable for the modern world, claims Ralph Waldo Trine. And so, he argues in this 1915 work, men and women are freeing themselves from the shackles of the Church, with its emphasis on fear and negativity, and looking for something more positive, something that has real value and can help them cope with the struggles and trials of everyday life. In *In the Hollow of His Hand*, Trine, one of the most influential thinkers in the early New Age philosopher of "New Thought," explains just how the Church got to be that way, and offers a guide for the reader looking for a more personal relationship with God. American mystic and bestselling author RALPH WALDO TRINE (1866-1958) wrote more than a dozen books, including *The Higher Powers of Mind and Spirit* (1917), *The World's Balance Wheel* (1917), *In Tune with the Infinite* (1897), and *The Greatest Thing Ever Known* (1898).
