Bush War Operator Sep 01 2020 From the searing heat of the Zambezi Valley to the freezing cold of the Chimanimani Mountains in Rhodesia, from the bars in Port St Johns in the Transkei to the Drakensberg Mountains in South Africa, this is the story of one man's fight against terror, and his conscience. Anyone living in Rhodesia during the 1960s and 1970s would have had a father, husband, brother or son called up in the defense of the war-torn, landlocked little country. A few of these brave men would have been members of the elite and secretive unit that struck terror into the hearts of the ZANLA and ZIPRA guerrillas infiltrating the country at that time - the Selous Scouts. These men were highly trained and disciplined, with skills to rival the SAS, Navy Seals and the US Marines, although their dress and appearance were wildly unconventional: civilian clothing with blackened, hairy faces to resemble the very people they were fighting against. Twice decorated - with the Member of the Legion of Merit (MLM) and the Military Forces' Commendation (MFC) - Andrew Balaam was a member of the Rhodesian Light Infantry and later the Selous Scouts, for a period spanning twelve years. This is his honest and insightful account of his time as a pseudo operator. His story is brutally truthful, frightening, sometimes humorous and often sad. In later years, after Rhodesia became Zimbabwe, he was involved with a number of other former Selous Scouts in the attempted coups in the Ciskei, a South African homeland, and Lesotho, an independent nation, whose only crimes were supporting the African National Congress. Training terrorists, or as they preferred to be called, 'liberation armies', to conduct a war of terror on innocent civilians, was the very thing he had spent the last ten years in Rhodesia fighting against. This is the true, untold story of these failed attempts at governmental overthrows.

Using Cognitive and Affective Metrics in Educational Simulations and Games Jul 19 2019

Presenting original studies and rich conceptual analyses, this volume explores how cognitive and affective metrics can be used to effectively assess, modify, and enhance learning and assessment outcomes of simulations and games used in education and training. The volume responds to the increasing use of

computer-based simulations and games across academic and professional sectors by bringing together contributions from different research communities, including K-12 and postsecondary education, medical, and military contexts. Drawing on empirical results, the chapter authors focus on the design and assessment of educational simulations and games. They describe how quantitative and qualitative metrics can be used effectively to evaluate and tailor instructional resources to the cognitive and affective needs of the individual learner. In doing so, the volume enhances understanding of how games and simulations can intersect with the science of learning to improve educational outcomes. Given its rigorous and multidisciplinary approach, this book will prove an indispensable resource for researchers and scholars in the fields of educational assessment and evaluation, educational technology, military psychology, and educational psychology.

The Last Days of the United States Asiatic Fleet Oct 02 2020 After the attack on Pearl Harbor (December 7), American sailors of the Asiatic Fleet (where it was December 8) were abandoned by Washington and left to conduct a war on their own, isolated from the rest of the U.S. naval forces. Their fate in the Philippines and Dutch East Indies was often grim--many died aboard burning ships, were executed upon capture or spent years as prisoners of war. Many books have been written about the ships of the U.S. Asiatic Fleet, yet few look into the experiences of the common sailor. Drawing on official reports, past research, personal memoirs and the writings of war correspondents, the author tells the story of those who never came home in 1945.

Navy Basic Military Requirements (Navedtra 14325) - Nonresident Training Course Sep 13 2021 COURSE OVERVIEW: Basic Military Requirements, NAVEDTRA 14325, is a self-study training manual (TRAMAN)/nonresident training course (NRTC) that covers the basic knowledges required of the men and women of the U.S. Navy and Naval Reserve. This TRAMAN/NRTC provides subject matter that directly relates to the naval standards for the apprenticeship (E-2/E-3) rates. The naval standards are found in the Manual of Navy Enlisted Manpower and Personnel Classification and Occupational Standards (Volume 1), NAVPERS 18068F. THE COURSE: This self-study course is organized into subject matter areas, each containing learning objectives to help you determine what you should learn along with text and illustrations to help you understand the information. The subject matter reflects day-to-day requirements and experiences of personnel in the rating or skill area. It also reflects guidance provided by Enlisted Community Managers (ECMs) and other senior personnel, technical references, instructions, etc.

The U.S. Navy at Normandy Jun 29 2020 In the many historical accounts of D-Day, the Navy, Coast Guard and merchant marine, who transported troops to the invasion beaches and supported the attack, are often given scant attention. Film clips of landing craft unloading men into the surf and battleships firing on enemy emplacements are familiar yet comparatively little is known about the contributions of the marine services and what they accomplished during the Normandy Invasion. This book describes the Allied naval command structure for Operation Neptune and offers a comprehensive look at integrated offshore operations--how they were organized, who the sailors were and what they experienced.

How I Learned About Life - Going to School in the Navy Jul 31 2020 This book is the second in a series about how I learned some of the most important lessons in life. For me many of those lessons happened while I was in the navy. That should be understandable because that was the first time I was away from home, still in my late teens but on my own out in the world away from the comfortable and secure surroundings I grew up in. This book covers the time period when I was still new in the navy, going to various schools before I would be of any real use. It's not really about the navy as much as it is about the people. What people do is where you learn a lot about life.

U.S. Naval Amphibious Forces Dec 16 2021 Volume Three in the series, this book is a detailed examination of the uniforms and equipment used by elite and specialty units of the American Navy during World War II. Collectors and history scholars will marvel at the array of previously unpublished text and imagery covering such elusive subjects as pre-war landing parties, the Seabees, Naval Beach Battalions, Naval Combat Demolition Units and Underwater Demolition Teams. Obscure and little known specialties are also highlighted including Scouts and Raiders, Beach Jumpers, Shore Fire Control Parties, Hard-Hat Salvage Divers and more. Hundreds of rare and exceptional artifacts are showcased in addition to complete original uniforms modeled in realistic settings with accurate descriptions of their wartime use. Condensed unit histories of the Seabee battalions, beach battalions, UDT teams and NCDU teams are also cataloged for the first time in one volume.

Crossed Currents Feb 06 2021 This new, revised edition of the path-breaking first history of the female members of the U.S. Navy has been updated to include the recent integration of Navy women into the crews of combat shops and tactical aviation squadrons, and the contributions of Navy women to the space program. It is a comprehensive chronicle of inspirational service spanning nearly the entire century.

Mechanic on the Wing Sep 20 2019 During World War II almost 60 United States Navy Carrier Aircraft Service Units (CASUs) were established and deployed to Pacific locations in support of naval aircraft operations. Faced with a lack of aircraft carriers early in the war and no organizational means to support airplanes at quickly constructed airfields on islands in the Southwestern Pacific, the CASUs were a wartime necessity and their story has not been told. CASU-11 was commissioned on Friday, 22 January 1943 and decommissioned on Friday, 1 November 1946, a period of service that lasted three years, nine months and ten days. During that time they traveled approximately 27,000 miles, serviced over 2,000 aircraft and more than 1,700 aviation machinists, metalsmiths, enginemen, electricians and ordnance men passed through its ranks. It is noteworthy that CASU-11 bookended World War II in the Pacific. They were present on Guadalcanal, the first island reclaimed from Japanese occupation, and they were present on Okinawa, the last island reclaimed before the war ended. A war diary for this unit has never been found and little has been written about this CASU. Based on personal diaries, face-to-face interviews, service records and memories shared by CASU-11 service members with their children *Mechanic on the Wing* is the story of these heroic men.

Blue Water Navy Vietnam Veterans and Agent Orange Exposure Jan 25 2020 Over 3 million U.S. military personnel were sent to Southeast Asia to fight in the Vietnam War. Since the end of the Vietnam War, veterans have reported numerous health effects. Herbicides used in Vietnam, in particular Agent Orange have been associated with a variety of cancers and other long term health problems from Parkinson's disease and type 2 diabetes to heart disease. Prior to 1997 laws safeguarded all service men and women deployed to Vietnam including members of the Blue Navy. Since then, the Department of Veteran Affairs (VA) has established that Vietnam veterans are automatically eligible for disability benefits should they develop any disease associated with Agent Orange exposure, however, veterans who served on deep sea vessels in Vietnam are not included. These "Blue Water Navy" veterans must prove they were exposed to Agent Orange before they can claim benefits. At the request of the VA, the Institute of Medicine (IOM) examined whether Blue Water Navy veterans had similar exposures to Agent Orange as other Vietnam veterans. *Blue Water Navy Vietnam Veterans and Agent Orange Exposure* comprehensively examines whether Vietnam veterans in the Blue Water Navy experienced exposures to herbicides and their contaminants by reviewing historical reports, relevant legislation, key personnel insights, and chemical analysis to resolve current debate on this issue.
