Educational Accountability Jun 13 2021 Educational Accountability: International perspectives on challenges and possibilities for school leadership provides an opportunity to assess, reflect on, and discuss current issues surrounding accountability policies in education from around the globe and the implications they hold for school leadership. It addresses the global trend of accountability policies expanding in scope to include the education profession as well as the increasing incidence of international policy borrowing, brought on chiefly by globalisation. Specific case studies offer a contextual examination of the theory, policy and practice of accountability and an inspection of their influence on school leadership. Cases are intentionally juxtaposed to provide a broad perspective of regional and cultural similarities and departures, and are arranged to reflect the diasporic Chinese, Anglo, European, and Hispanic societies. Bringing together a number of highly regarded experts within the field, the book cultivates a global perspective on the challenges and possibilities for school leaders to foster school effectiveness and improvement. Educational Accountability should be key reading for researchers, policy makers, and current and future school leaders.

Bias Challenges in International Commercial Arbitration Apr 30 2020 Shows how 'dirty' challenge

tactics are made viable primarily by the prevalence of a judicially derived test for bias which focuses on appearances, rather than facts and He argues that the most commonly used test of bias, the 'reasonable apprehension' test, makes it easy to allege a lack of impartiality and independence.

Challenges of International Law in the Asian Region Mar 22 2022 This book provides an innovative outlook of the various challenges of international law in the Asian region. Moving away from the Eurocentrism prevalent in the literature on the subject, it provides a comprehensive Asian perspective without adopting a monolithic or homogeneous Asian approach. Although Asian countries converge on certain issues related to international law, such as engagement with the United Nations, at times, there is a significant divergence, such as in the case of agricultural trade liberalisation. Given the vastness of the region and the differing political systems, there are many discrepancies to consider. The book takes into account the viewpoint of civil society so as to avoid a vertical state-centred approach. Offering an easy-to-understand presentation of key issues concerning the region, this book is a useful introduction to this complex topic for students, academics and practitioners of international law.

Cross-cultural Challenges in International Management Jan 20 2022 The development of international business and of globalization in every field of activity requires the interaction of individuals and groups with diverse cultural, religious, ethnic and social characteristics in different institutional contexts. *Cross-cultural Challenges in International Management* addresses the various difficulties that may impede smooth communication and cooperation of those involved in such interactions. It examines what types of resources are mobilized to overcome such difficulties. The cultural and societal challenges of international management must be considered at different levels, the one of strategy, which the first part of the book is devoted to, but also that of management and business practices, addressed in the third part of the book. Both strategic decisions and daily business practices, however, in the particularly fluctuating and incompletely defined international context, gain from being framed by ethical and corporate social responsibility, which the second part of this book is devoted to. *Cross-cultural Challenges in International Management* provides an analysis of specific situations revealing such cultural or societal challenges. Thus, the reader will benefit not only from advanced theoretical knowledge in the field, but also from practical applications in various professional context and various countries. Practitioners, students in various fields of social sciences, particularly in management, communication, international relations, and researchers will widely benefit from this book.

The book draws on different perspectives to understand a range of problems that negatively affect teacher recruitment and retention, unpicking key challenges, including links between the disadvantages of location and access to teachers for coastal and rural schools, rising pupil numbers, declining school budgets and the role of professional learning in raising teacher status. International Challenges in Investment Arbitration May 12 2021 As the proverbial workhorse of international economic law, investment arbitration is heavily relied upon around the globe. It has to cope with the demands of increasingly complex proceedings. At the same time, investment arbitration has come under close public scrutiny in the midst of heated political debate. Both of these factors have led to the field of investment protection being subject to continuous changes. Therefore, it presents an abundance of challenges in its interpretation and application. While these challenges are often deeply rooted in the doctrinal foundations of international law, they similarly surface during live arbitral proceedings. *International Challenges in Investment Arbitration* serves not only as a collection of recently debated issues in investment law; it also deals with the underlying fundamental questions at the intersection of investment arbitration and international law. The book is the product of the 1st Bucerius Law Journal Conference on International Investment Law & Arbitration. It combines the current state of knowledge, new perspectives on the topic as well as practical issues and will be of interest to researchers, academics and practitioners in the fields of international investment law, international economic law, regulation and comparative law.

Global Challenges in Public Finance and International Relations Apr 11 2021 Although the concept of international public goods has been established, new international public needs arise by the day. For example, while there are many taxation problems and debates that have not yet been resolved internationally, many new tax-related problems like international transfer pricing, taxation of virtual profits, and taxation of electronic commerce are being added. These issues require studies that will discuss a new agenda and propose solutions for these dilemmas and problems. *Global Challenges in Public Finance and International Relations* provides an innovative and systematic examination of the present international financial events and institutions, international financial relations, and fiscal difficulties and dilemmas in order to discuss solutions for potential problems in the postmodern world. Highlighting topics such as international aid, public debt, and corporate governance, this publication is designed for executives, academicians, researchers, and students of public finance.

International Economic Law and the Challenges of the Free Zones Aug 15 2021 Special economic zones (SEZs) have become a permanent feature of the world trade scene. This book, the first to provide a critical and comprehensive analysis of SEZs covering a wide spectrum of countries and regions, shows how SEZs, albeit established at the domestic level by different countries, raise multiple legal issues under international economic law. This first-rate book is the product of the Asia FDI Forum IV held in Hong Kong in 2018. Thoroughly exploring the development of the SEZ phenomenon and its players, the contributing authors (all leading economic law experts) review the issues raised by SEZs in the context of international trade law, international investment law and investment arbitration. They identify the extent to which SEZs have been coherent in their design and policymaking, in particular with regard to domestic law reforms. They address such aspects (both core themes and specific examples) as the following: investment protection in China's SEZs; state-owned enterprises regulation; dispute settlement; under what circumstances incentives available in SEZs count as export subsidies prohibited under World Trade Organization (WTO) rules; compliance with internal market rules in European Union (EU) free zones; local populations as victims of land expropriation; Brazil's Manaus Free Trade Zone; India's experience with multiple SEZs; the administrative approval system in the Shanghai Free Trade Zone; economic corridors and transit routes as SEZs; 'refugee cities': SEZs for migrants; how China's Supreme People's Court serves national strategy; how foreign investors challenge free-zone regimes; impacts of the establishment of SEZs on tax revenues; SEZs and labour migration; and management models. The chapters also include insights into the new emerging generation of international investment agreements; WTO accession, transparency, and case law materials clarifying specific trade issues associated with SEZs; and new rules to protect the environment and labour rights, as well as analysis of crucially significant cases such as *Goetz v. The Republic of Burundi*, *Lee Jong Baek v. Kyrgyzstan* and *Ampal-*

American and Others v. Egypt. With its critical and comprehensive analysis of the dynamic SEZ phenomenon across legal, economic, investment, regulatory and policy matrices – including a thorough analysis of the success factors and required policies for SEZs – this book takes a giant step towards answering the question whether SEZs fundamentally contradict norms of international law or whether SEZs have to be considered as laboratories which facilitate the implementation of international economic policies. Its careful examination of theory and practice and its approach to lessons learned from case studies will reward trade and investment officials, policymakers, diplomats, economists, lawyers, think tanks, business leaders and others interested in this ever more important area of law and economics.

Challenges For International Organizations in the 21st Century May 24 2022 This book brings together two major developments of the past decade: the collapse of the Soviet Union on the political side and "globalization" on the economic side. It shows that both of these drastic changes resulted in an increasing demand for regulation and guidance by international organizations, which on their side feel an increasing pressure for adjustment to the changed international agenda.

Business and Human Rights in Europe Oct 25 2019 Transnational business activities are important drivers of growth for developing and the least developed countries. However, they can also negatively impact the enjoyment of human rights. In some cases, multinational enterprises (MNEs) have even been accused of grave human rights abuses in the territory of the states where their subsidiaries operate. Since

the parent companies of many MNEs are incorporated under the law of European states, those countries' domestic law and the European legal framework play a crucial role in establishing how their activities should be conducted – also throughout their supply chains – and which remedies will be available when corporate human rights violations occur. In recent years, the European Union, the Council of Europe and their Member States have been adopting policies and legislation to ensure respect for human rights by businesses and have developed a body of related case law. These legal instruments can be considered the European responses to the challenges posed at international-law level, and they constitute the focus of research of this book. Through its collected chapters – written by scholars and practitioners under the direction of the editor, Angelica Bonfanti – the book identifies the European solutions to the business and human rights international legal issues, provides an overall assessment of their effectiveness, and examines their potential evolution.

International Businesses and the Challenges of Poverty in the Developing World Oct 17 2021 We live in a globally interconnected but economically divided world where internationally linked businesses can play a significant role in helping and/or obstructing the development of impoverished countries. Through a series of case studies, this volume examines what can be learned, both positively and critically, from the experiences of selected internationally connected firms in Nigeria, Uganda, Ghana, Vietnam, Guyana, and the Nunavik region of northern Canada. This book begins with a set of reflections on the strategies firms might adopt so that they develop both their own assets as well as those of the areas in which they operate. A team of more than two dozen researchers from the developed and developing countries conducted the research on which the essays on this and subsequent volumes are based. Dr Frederick Bird from Concordia University in Montreal directed the overall research project.

Introduction to International Politics Nov 25 2019 This is a first edition core text for freshman/sophomore-level courses on International Relations—the second largest course market in political science. Introduction to international politics courses typically have multiple goals. On the one hand, instructors seek to introduce students to the discipline through readings and discussions of foundational theoretical perspectives and ongoing debates. On the other hand, instructors seek to help students become informed participants in policy debates about foreign policy and international politics issues by highlighting pressing contemporary issues. Effectively addressing both concerns requires more than simply including both topics in the course syllabus or in a textbook. It requires making systematic linkages between theory and policy. This is a long standing challenge in international politics, one raised many years ago by Alexander George in *Bridging the Gap* in which he called for greater communication between academic scholars and practitioners. This text seeks to link theory and policy in an organized and efficient fashion that does not ignore or slight the conceptual discussion of international relations or simply chase newspaper headlines. Chapters are organized around “Global Challenges and Policy Responses.” The challenges are presented as concrete policy problems relevant to the theme of the chapter. The discussion of responses emphasize concrete actions being taken or proposed by international organizations, the foreign policies of key states, international agreements, and actions taken by NGOs. Theoretical insights are used to help students understand challenges, think about solutions, and learn from the past.

This textbook is essential reading for undergraduate,

postgraduate and MBA students studying international business for the first time.

The Rise of the Right Feb 09 2021 "This is a complicated book that addresses a complex and controversial topic. With "the rise of the Right" we refer to a broad spectrum of contemporary movements and tendencies that may be loosely dubbed as "the Right." The Right, in the sense we use that concept, in this book can be both religious and political-and is predominantly a mixture of both. We address the question at hand from different perspectives, reflecting the distinct environments in which we live, teach, and interact. This book is intended to reflect sober analysis of a trend that largely defines the contemporary age, and to focus, in part-but by no means exclusively-on the impact of free speech and its possible limits. In that sense, we pay particular attention to the use of rhetoric within the context of the rise of the Right. We do so because of the importance of language in explaining and understanding this development"--

Struggling with Success Jun 01 2020 Globalization, by which is meant the increasing economic interdependence among nations, has been a critical ingredient in enabling enormous improvement in mankind's condition. This volume focuses on the successes of globalization, and some of the main economic policy challenges and solutions that arise to enhance the benefits and lower the costs. It covers different aspects of globalization, sovereign debt restructuring, development of the financial sector and financial crises in Asia, Turkey, Brazil, etc. The final part of the book covers multilateral international organizations, namely the World Trade Organization, the IMF and the World Bank.

Trends and Challenges in International Law Oct 05 2020 Over the last century, international law has sought to keep pace with sweeping changes that have revolutionised the international community. It has done so in various ways: by developing new fields, adopting new legal instruments, and including new actors and entities in the international fora. Human rights law and environmental law have emerged to address essential issues raised by civil society. Treaties, judgments and soft law instruments have attempted to fill the gaps in regulation. International organisations, corporations, civil society organisations and individuals have all worked to make and enforce, also by judicial means, legal rules. But is all this sufficient? In an effort to answer this question, the chapters of this volume explore selected

emerging issues in the fields of human rights, the environment, cultural heritage and law of the sea. Can state responsibility help to protect the environment? Can protecting human rights be reconciled with national security? Can the UN Security Council address climate change? Is law of the sea still fit for purpose? And how can we balance human rights and the environment, or cultural heritage and law of the sea? The international scholars and experienced practitioners who have contributed to this volume discuss these and other key questions. Given its scope, the book will appeal to researchers and scholars of international law, as well as those specialising in human rights law, environmental law, cultural heritage law, and law of the sea.

The Rebirth of Area Studies Jun 20 2019 Area Studies became increasingly common after World War II as a means of responding to perceived 'external threats' from the Soviet Union and China. After the Cold War and in the face of increasingly rapid globalisation, it seemed inevitable that Area Studies – institutionally and intellectually – would slowly degenerate. But this has not been the case, and there has recently been a resurgence of interest in it as an effective and positive research paradigm. Responding to this renewed interest, this book brings together an esteemed group of contributors at the cutting edge of the field to consider the state of Area Studies today and its prospects for the future. *The Rebirth of Area Studies* demonstrates that numerous aspects of the research paradigm in fact recommend it as well-suited for the present moment and the challenges posed by globalisation, both as a means to overcome disciplinary limitations and to increase self-reflexivity. Area Studies research is grounded in place-specific knowledge, yet by definition it transcends nation as the basic unit of analysis and thus empowers comparative and trans-national approaches. This book outlines a new, critical Area Studies for the 21st century – self-reflexive, aware of its limitations and conscious of its origins in geopolitical, strategic or ideological considerations – and is essential reading for historians, geographers and political scientists.

China's Challenges and International Order Transition Sep 28 2022 *China's Challenges and International Order Transition* introduces an integrated conceptual framework of "international order" categorized by three levels (power, rules, and norms) and three issue-areas (security, political, and economic). Each contributor engages one or more of these analytical dimensions to examine two questions: (1) Has China already challenged this dimension of international order? (2) How will China challenge this dimension of international order in the future? The contested views and perspectives in this volume suggest it is too simple to assume an inevitable conflict between China and the outside world. With different strategies to challenge or reform the many dimensions of international order, China's role is not a one-way street. It is an interactive process in which the world may change China as much as China may change the world. The aim of the book is to broaden the debate beyond the "Thucydides Trap" perspective currently popular in the West. Rather than offering a single argument, this volume offers a platform for scholars, especially Chinese scholars vs. Western scholars, to exchange and debate their different views and perspectives on China and the potential transition of international order.

Heightened volatility in the global economy and intensifying geopolitical rivalries pose complex policy challenges for small countries embarking on post-conflict daunting challenges. To sustain peace, development needed to be broad based and inclusive. It needed to rapidly reconstruct war-devastated regions, restore macroeconomic stability, while delivering a 'peace dividend'. The book contains contributions that highlight Sri Lanka's endeavours of coping with adverse shocks, while exploiting new opportunities. It showcases how the island country had to attract capital and assistance, and support of the international community, including that of the rising Asian giants – China and India. Addressing the post-conflict challenges of sourcing development finance in a

new global financial and political landscape, the book would be of interest to researchers working on post-conflict development in the context of a volatile global economy and changing aid architecture, and would also act as an important resource for policy makers.
