Generational Use of New Media Jul 08 2020

Generational Use of New Media examines and contrasts how younger and older people, representing different generations, engage with the new media that they increasingly encounter in everyday life. Exploring the various assumptions about the degrees to which younger and older people are more or less willing to use, or are capable of using, new media, the social circumstances under which they do so and the

very design of those media, this book critically examines the gap that is assumed to exist between younger users of new media and older non-users. Thematically organised and offering comparative analyses of the generational use of new media and technology, this timely volume presents the latest research and rich new empirical material gathered in the EU, USA and Hong Kong, to reflect on societal practices and the practical implications of building a more inclusive information society.

*Manual of Pharmacologic Calculations* Mar 04 2020 This book contains a collection of quantitative procedures in common use in pharmacology and related disciplines. It is intended for students and researchers in all fields who work with drugs. Many physicians, especially those concerned with clinical pharmacology, will also find much that is useful. The procedures included may be considered "core" since they are generally applicable to all classes of drugs. Some of the procedures deal with statistics and, hence, have even wider application. In this new edition we have increased the number of procedures from 33 (in the first edition) to 48. Other procedures have been revised and expanded. Yet the basic philosophy of this new edition remains unchanged from the first. That is, the pharmacologic basis of each procedure is presented, along with the necessary formulas and one or more worked examples. An associated computer program is included for each procedure and its use is illustrated with the

same worked example used in the text. The discussions of theory and the sample computations are brief and self-contained, so that all computations can be made with the aid of a pocket calculator and the statistical tables contained in Appendix A. Yet it is realized that the proliferation of lower-priced microcomputers is likely to mean that more and more readers will utilize a computer for most calculations. Accordingly, we have modified the format of the book to facilitate computer usage. **Organizational maintenance manual** Jan 14 2021

**Best Before** Sep 09 2020 Despite record sales and an ever-growing global industry, the simple fact is that videogames are disappearing. Most obviously, the physical deterioration of discs, cartridges, consoles and controllers means that the data and devices will crumble to dust and eventually will be lost forever. However, there is more to the disappearance of videogames than plastic corrosion and bit rot. Best Before examines how the videogames industry's retail, publishing, technology design, advertising and marketing practices actively produce obsolescence, wearing out and retiring old games to make way for the always new, just out of reach, 'coming soon' title and 'next generation' platform. Set against the context of

material deterioration and the discursive production of obsolescence, Best Before examines the conceptual and practical challenges faced within the nascent field of game preservation. Understanding videogames as rich, complex and mutable texts and experiences that are supported and sustained by cultures of gameplay and fandom, Best Before considers how - and even whether - we might preserve and present games for future generations.

Advances in Digital Forensics VI Jan 26 2022

Advances in Digital Forensics VI describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Forensic Techniques, Internet Crime Investigations, Live Forensics, Advanced Forensic Techniques, and Forensic Tools. This book is the sixth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty-one edited papers from the Sixth Annual IFIP WG 11.9 International Conference on Digital Forensics, held at the University of Hong Kong, Hong Kong, China, in January 2010.
