*Sensing the Nation's Law* Aug 08 2020 This book examines how the nation – and its (fundamental) law – are ‘sensed’ by way of various aesthetic forms from the age of revolution up until our age of contested democratic legitimacy. Contemporary democratic legitimacy is tied, among other things, to consent, to representation, to the identity of ruler and ruled, and, of course, to legality and the legal forms through which democracy is structured. This book expands the ways in which we can understand and appreciate democratic legitimacy. If (democratic) communities are “imagined” this book suggests that their “rightfulness” must be “sensed” – analogously to the need for justice not only to be done, but to be seen to be done. This book brings together legal, historical and philosophical perspectives on the representation and iconography of the nation in the European, North American and Australian contexts from contributors in law, political science, history, art history and philosophy.

*School Law* Nov 10 2020 An engaging, case-based approach to the most up-to-date legal topics gives educators a basic understanding of the legal aspects of their work. This text introduces K-12 educators to a body of school law that will help them to conduct themselves in a legally defensible manner. A balance of case law, statutory law, constitutional provisions, and analytical commentary, this vital book covers a wide range of topics including: sources of law under which educators operate; legal restraints to state action in K-12 education; legal rights and restrictions applicable to students and teachers; law pertaining to persons with disabilities; and liability for damages as a result of official action or inaction. In addition, broad legal concepts such as due process, equal protection, freedom of expression, the wall separating church and state, and reasonable search are analyzed to assist professional educators in gaining a better understanding of the legal landscape in which they operate. The entire text is written in a clear, engaging style appropriate for those who do not have extensive legal backgrounds.

*The Revised Code of the Statute Laws of the State of Mississippi* Aug 27 2019

*Performing Copyright* Sep 08 2020 Based on empirical research, this innovative book explores issues of performativity and authorship in the theatre world under copyright law and addresses several inter-connected questions: who is the author and first owner of a dramatic work? Who gets the credit and the licensing rights? What rights do the performers of the work have? Given the nature of theatre as a medium reliant on the re-use of prior existing works, tropes, themes and plots, what happens if an allegation of copyright infringement is made against a playwright? Furthermore, who possesses moral rights over the work? To evaluate these questions in the context of theatre, the first part of the book examines the history of the dramatic work both as text and as performative work. The second part explores the notions of authorship and joint authorship under copyright law as they apply to the actual process of creating plays, referring to legal and theatrical literature, as well as empirical research. The third part looks at the notion of copyright infringement in the context of theatre, noting that cases of alleged theatrical infringement reach the courts comparatively rarely in comparison with music cases, and assessing the reasons for this with respect to empirical research. The fourth part examines the way moral rights of attribution and integrity work in the context of theatre. The book concludes with a prescriptive comment on how law should respond to the challenges provided by the theatrical context, and how theatre should respond to law. Very original

and innovative, this book proposes a ground-breaking empirical approach to study the implications of copyright law in society and makes a wonderful case for the need to consider the reciprocal influence between law and practice.

**National and Regional Parliaments in the EU-Legislative Procedure Post-Lisbon** Apr 03 2020

Much has changed in European constitutional law after the Lisbon Treaty, not least the efforts to increase democratic legitimacy by engaging national legislatures and introducing a stricter subsidiary review process, namely the Early Warning Mechanism (EWM). This collection looks at how national parliaments have adapted to their new roles and looks at how the new system has impacted on relations between the EU legislative bodies and national parliaments. A team of experts from across Europe explore the effect of the EWM on the national constitutional orders; analyse the regional impact of EWM and evaluate the new system of scrutiny.

**Fundamental Rights and Mutual Trust in the Area of Freedom, Security and Justice** Mar 03

2020 This book explores the relationship of mutual trust and fundamental rights in the Area of Freedom, Security and Justice (AFSJ) of the European Union and asks whether there is any role for proportionality. Mutual trust among Member States has long been presumed by the Court in a manner that mutual recognition was prioritised in regard to, but to the detriment of, the protection of fundamental rights. After thoroughly reviewing this relationship, this book offers a comprehensive framework of proportionality and explores its impact on the protection of fundamental rights in a mutual trust environment. It applies a theoretical and a normative framework of proportionality to two case studies (EU criminal and asylum law) by reference to several fundamental rights, enabling a carefully constructed analysis with useful parallels. The book argues that such analysis, based on proportionality, is not always desirable and helpful for the protection of fundamental rights in this area and thoroughly explores its impact on the protection of fundamental rights vis-à-vis mutual trust.

*Yearbook on International Investment Law and Policy 2014-2015* Jan 01 2020 Several themes emerge in this 2014-2015 edition of the Yearbook. The first is a notable focus on country and region-specific developments. Different articles focus on key developments in such countries as Australia, Brazil, China, Ghana, India, Indonesia, Russia, and South Africa. Others focus on regional innovations, in particular in Latin America. A second area of attention is reform, and proposals for reform, in investor-state dispute settlement and in investment law generally. The third theme is the

continued concern about states' regulatory autonomy and the importance of their retaining ability to protect the interests of their nationals. A fourth theme concerns the continued contribution that investment arbitration makes to the development of international law, and the influence that it is starting to have on other areas of law, whether that is as a source of inspiration in the interpretation of other norms or as a source of potentially powerful persuasive authority given the "teeth" that investment law has with respect to enforcement. Included are the winning memorials of the FDI Moot for both 2014 and 2015. In 2014 a team from the University of Ottawa submitted the winning claimant's memorial, while students from Harvard Law School submitted the winning respondent's memorial. In 2015, Harvard repeated its stellar performance, again winning best respondent's memorial. The winning claimant's memorial in 2015 was submitted by students from the National and Kapodistrian University of Athens. These excellent memorials reveal once again the growing interest of students in international investment law and demonstrate a striving for excellence and an enthusiasm for grappling with intellectually challenging issues.

**Power from Within** Jun 25 2019 There is no end in sight to the frequency with which physicians, nursing professionals and other healthcare providers will become lawsuit targets in our litigious society. While politicians, practitioners, insurance companies and trial attorneys debate the nation's chronic malpractice crisis, suits continue to be filed. In addition, once COVID-19 is behind us and the unprecedented public support for health care providers wanes, as it will, it is anticipated that physicians and nurses will become malpractice defendants to a remarkable degree. National legislative fact-finding committees and investigative bodies, which may be charged with the responsibility of pursuing a solution, likely will never achieve a global remedy. Although curtailed by some states, national legislation has not addressed baseless malpractice suits or grossly excessive monetary verdicts. Another approach exists, however. Health care providers can impact the existing system and influence the malpractice environments in a tangible, positive and powerful fashion. Although there will be debate over tort reform in order to bring some degree of protection to the malpractice defendant, individual case success, defined from the defendant's perspective as a no-cause trial verdict, can be realized if well-credentialed and experienced health care professionals are willing to assist the malpractice defense bar as expert witnesses. The benefits to the health care community and the individuals who are willing to participate are innumerable and worth considering.

**Sports Law in Hungary** Nov 30 2019 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Hungary deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Hungary will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

**Litigants in Person and the Family Justice System** Jul 27 2019 This book is about those who

represent themselves as Litigants in Person in the family justice system. It calls for a refocusing of the debate about the historical challenges associated with Litigants in Person as well as the role they should play within the family justice system in England and Wales. Drawing together interviews with Litigants in Person and decades of research into self-representation from across multiple jurisdictions, this book provides an account of the family justice system through the eyes of its users. It employs an innovative socio-legal framework comprising feminist theory, a Bourdieusian theory of class, vulnerability theory, and actor-network theory to explore the journey that Litigants in Person take through the legal, cultural and social context of the family court. It provides fresh insight into the diverse challenges that people face within this process and how these relate to wider pressures within the family justice system. It argues that there are important lessons to be learned from Litigants in Person. By understanding how and why people come to the point of self-representing, and the kinds of experiences they have when they do, the book advocates the importance of forging a more positive and effective relationship between Litigants in Person and the family justice system.

*The Irish Yearbook of International Law* Jan 25 2022 The Irish Yearbook of International Law (IYIL) supports research into Ireland's practice in international affairs and foreign policy, filling a gap in existing legal scholarship and assisting in the dissemination of Irish thinking and practice on matters of international law. On an annual basis, the Yearbook presents peer-reviewed academic articles and book reviews on general issues of international law. Designated correspondents provide reports on international law developments in Ireland, Irish practice in international bodies, Ireland and the Law of the Sea and the law of the European Union as relevant to developments in Ireland. In addition, the Yearbook reproduces key documents that reflect Irish practice on contemporary issues of international law. Publication of The Irish Yearbook of International Law makes Irish practice and opinio juris more readily available to governments, academics and international bodies when determining the content of international law. In providing a forum for the documentation and analysis of North-South relations the Yearbook also makes an important contribution to post-conflict and transitional justice studies internationally. As a matter of editorial policy, the Yearbook seeks to promote a multilateral approach to international affairs, reflecting and reinforcing Ireland's long-standing commitment to multilateralism as a core element of foreign policy. The ninth volume of The Irish Yearbook of International Law engages with contemporary issues in international law, raising questions both as to the conceptual underpinnings of international law in relation to the

Responsibility to Protect doctrine, and state practice in fields such as Law of the Sea and belligerent occupation, prosecution of war crimes in domestic courts, and the evolving field of international disability law.

Global Challenges in the Arctic Region Jun 05 2020 Bringing together interconnected discussions to make explicit the complexity of the Arctic region, this book offers a legal discussion of the ongoing territorial disputes and challenges in order to frame their impact into the viability of different governance strategies that are available at the national, regional and international level. One of the intrinsic features of the region is the difficulty in the determination of boundaries, responsibilities and interests. Against this background, sovereignty issues are intertwined with environmental and geopolitical issues that ultimately affect global strategic balances and international trade and, at the same time, influence national approaches to basic rights and organizational schemes regarding the protection of indigenous peoples and inhabitants of the region. This perspective lays the ground for further discussion, revolving around the main clusters of governance (focusing on the Arctic Council and the European Union, with the particular roles and interest of Arctic and non-Arctic states, and the impact on indigenous populations), environment (including the relevance of national regulatory schemes, and the intertwinement with concerns related to energy, or migration), strategy (concentrating in geopolitical realities and challenges analysed from different perspectives and focusing on different actors, and covering security and climate change related challenges). This collection provides an avenue for parallel and converging research of complex realities from different disciplines, through the expertise of scholars from different latitudes.

**Reconceptualising the Rule of Law in Global Governance, Resources, Investment and Trade**

Dec 12 2020 The relevance and importance of the rule of law to the international legal order cannot be doubted and was recently reaffirmed by the Declaration of the High-level Meeting of the General Assembly on the Rule of Law at the National and International Level's solemn commitment to it on behalf of states and international organizations. In this edited collection, leading scholars and practitioners from the fields of global governance, resources, investment and trade examine how the commitment to the rule of law manifests itself in the respective fields. The book looks at cutting-edge issues within each field and examines the questions arising from the interplay between them. With a clear three-part structure, it explores each area in detail and addresses contemporary challenges while trying to assure a commitment to the rule of law. The contributions also consider how the rule of law has been or should be reconceptualised. Taking a multi-disciplinary approach, the book will appeal to international lawyers from across the spectrum, including practitioners in the field of international investment and trade law.

**Global Environmental Constitutionalism in the Anthropocene** Oct 29 2019 There is persuasive evidence suggesting we are on the brink of human-induced ecological disaster that could change life on Earth as we know it. There is also a general consensus among scientists about the pace and extent of global ecological decay, including a realisation that humans are central to causing the global socio-ecological crisis. This new epoch has been called the Anthropocene. Considering the many benefits that constitutional environmental protection holds out in domestic legal orders, it is likely that a constitutionalised form of global environmental law and governance would be better able to counter the myriad exigencies of the Anthropocene. This book seeks to answer this central question: from the perspective of the Anthropocene, what is environmental constitutionalism and how could it be extrapolated to formulate a global framework? In answering this question, this book offers the first systematic conceptual framework for global environmental constitutionalism in the epoch of the Anthropocene.

**Policing the Open Road** Oct 22 2021 Policing the Open Road examines how the rise of the car, that symbol of American personal freedom, inadvertently led to ever more intrusive policing--with disastrous consequences for racial equality in our criminal justice system. When Americans think of freedom, they often picture the open road. Yet nowhere are we more likely to encounter the long arm of the law than in our cars. Sarah Seo reveals how the rise of the automobile transformed American freedom in radical ways, leading us to accept--and expect--pervasive police power. As Policing the Open Road makes clear, this expectation has had far-reaching political and legal consequences.--

The Law of Mortgage, and Other Securities Upon Property Jan 13 2021

Netherlands Yearbook of International Law 2014 Aug 20 2021 The Netherlands Yearbook of International Law was first published in 1970. It offers a forum for the publication of scholarly articles of a more general nature in the area of public international law including the law of the European Union. One of the key functions or purposes of international law (and law in general for that matter) is to provide long-term stability and legal certainty. Yet, international legal rules may also function as tools to deal with non-permanent or constantly changing issues and rather than stable, international law may have to be flexible or adaptive. Prima facie, one could think of two main types of temporary aspects relevant from the perspective of international law. First, the nature

of the object addressed by international law or the 'problem' that international law aims to address may be inherently temporary (temporary objects). Second, a subject of international law may be created for a specific period of time, after the elapse of which this entity ceases to exist (temporary subjects). These types of temporariness raise several questions from the perspective of international law, which are hardly addressed from a more conceptual perspective. This volume of the Netherlands Yearbook of International Law aims to do exactly that by asking the question of how international law reacts to various types of temporary issues. Put differently, where does international law stand on the continuum of predictability and pragmatism when it comes to temporary issues or institutions?

**Criminal Law and Precrime** Oct 10 2020 In Philip K. Dick's short story *Minority Report*, the institution of Precrime punishes people with imprisonment for crimes they would have committed had they not been prevented. With Dick's allegorical inspiration, the authors of *Criminal Law and Precrime: Legal Studies in Canadian Punishment and Surveillance in Anticipation of Criminal Guilt* posit that recent developments in Canadian law indicate a trend toward imposing punitive measures at increasingly earlier stages of the prosecutorial process. The result is a potentially new field of criminal management that could be characterized as "precrime"—particularly the use of the law as a technology of surveillance and prevention since "terror" became a justification for intervention. The authors note that as risk management logics (based in actuarial sciences) have shifted to precautionary ones (based in administrative sciences), the law has responded by developing techniques in the arena of criminal regulation in light of the "war on terror": the need to ensure security, the proliferation of digital data, and the development of drones, social networking, and cloud storage to gather personal data. The authors view shifts in criminal investigation; the substantive criminal law of sexual expression, conduct, and work; and civil forfeiture as emblematic of precrime populism. The unifying theme of these techniques is that they occur prior to state-identified crime, arise out of a precautionary philosophy, and seek to presume (or circumvent) criminality. The book is a provocative read for scholars and students in criminal law, policing, and surveillance, as well as for those interested in how areas of law, such as immigration, health, and anti-terrorism, are mobilizing the logics of risk and surveillance in new ways that emphasize precaution. The authors invite legal scholars to place the analytical lens of precrime on criminal and regulatory practices in Canada as well as other Western nations across the globe.
