**Training in the Motor Vehicle Repair and Sales Sector in Germany**

Aug 01 2022 Training in the motor vehicle repair and sales sector in Germany was examined in a study that included the following approaches: review of the sector's structure/characteristics, institutional and social context, employment practices/trends, changes in the type of work and employment/training requirements, and available initial and continuing vocational education and training; in-depth case studies of five auto repair shops and dealerships; and identification of economic, employment, and training trends. It was discovered that, although the motor industry remains the most important industry in Germany's economy, it will not likely experience any more growth. Vehicle sales are declining; however, the volume of repairs is likely to increase as cars become older. Higher qualifications are being demanded of repair shop employees because of new environmental/safety standards and technological advances. Only about 7% of the sector's employees have no relevant vocational qualification, and one in every five employees is engaged in vocational training. Nearly all employees in aftersales departments and repair shops participate regularly in in-house continuing training and/or courses provided by manufacturers, importers, suppliers, or chambers of trades; however, many people in positions of responsibility within the sector still do not consider the available training activities sufficient. (Contains 63 tables/figures and 33 references.) (MN)

**The 300,000 Mile Car** Nov 23 2021 Innovations in technology, increasingly stringent government regulations, and consumer demands have all combined to make the automobile one of today's most significant investments. As costs for new and pre-owned vehicles continue to rise, extending the life of the car has never been more important. That's why The 300,000 Mile Car is a "must." Inside this highly readable, sometimes humorous, self-help manual are easy-to-understand explanations, tips, guidelines and strategies for everything - from estimating the real costs of car ownership through diagnosing common problems and avoiding fraud at the automotive repair shop. This guide devotes two chapters to the subject of purchasing a new or used car, going over items such as: finding out what dealers really pay, negotiating techniques, the games of the sales floor and how to avoid them, leasing vs. purchasing, types of leases, and how rebates actually work. An extraordinarily complete reference to economical car ownership, this book is guaranteed to take the mystery out of how cars operate and put readers in the driver's seat when it comes to controlling all of the expenses associated with owning and operating their vehicles.

**Driver Tips** Oct 30 2019 Have you ever gone to a mechanic shop for a basic service like an oil change and came out with a long list of recommendations? Whom can you believe? It is almost like going to a French restaurant and not understanding the menu. This book is not only to translate the menu, but also to help you with the selections and to help prevent surprises. Times change and now more than ever dependable transportation is one of the main necessities of life. Luxury is far from a priority. With this guide of repair options, you will become an expert on shopping for services. Prioritize repairs or preventive maintenance to keep a balance from a healthy transportation to a happy wallet. It is nice to know that you do not have to agree with the mechanic all the time, we (mechanics) can be wrong just like your doctor and believe to be right. This is not a do it yourself book. It is a dictionary for car services and help to teach whom to trust in this contaminated car industry. Keep it in the glove compartment and have a mechanic on your side all the time. **Auto Repair For Dummies** Jun 18 2021 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated

how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Training in the Motor Vehicle Repair and Sales Sector in the Netherlands Dec 25 2021 Training in the motor vehicle repair and sales sector in the Netherlands was examined in a study that included the following approaches: review of the sector's structure/characteristics, institutional and social context, employment practices, changing conditions, and available education and training; in-depth case studies of four auto repair shops and dealerships (two small, one medium-sized, and one large firm); and identification of economic, employment, and training trends. It was discovered that, in response to stagnation of the Dutch motor vehicle sales and repair industry in the 1990s, both the Dutch government and the industry have increased their commitment to vocational training and inservice courses and have created a training infrastructure that compares favorably with those of other sectors in the Dutch economy. All four businesses studied in depth were managed by individuals who were very involved in training, had access to good facilities and opportunities for on-the-job teaching/training, and could avail themselves of good external provisions for inservice training. Quality of service was an important element of training philosophy. Training needs were not always analyzed in a very structured way, and none of the businesses studied evaluated systematically the costs/benefits of training. Contains 20 references and 19 tables/figures. (MN)
