**Racism in America: A Reference Handbook** Sep 21 2021 This book explains how race, once a differentiating factor, became a major basis for stratification in America that pervaded scientific thought, religious doctrine, governmental policy, and the patterned actions of decision-makers in all sectors of social life. Racism in America: A Reference Handbook diverges from the typical focus of accounts of racism on interpersonal prejudice and discrimination to situate racism within structural processes to demonstrate the systematic nature of racial discrimination. **21st Century Political Science: A Reference Handbook** Sep 09 2020 This volume, meant to be the first in a series of catalogues documenting the Barnes Foundation's entire holdings, is the first major survey of the Barnes Collection since *Great French Paintings from the Barnes Foundation: Impressionist, Post-Impressionist, and Early Modern* (CH, Oct'93, 31-0715). Wattenmaker, a former student and instructor at the Barnes Foundation and former director of the Archives of American Art, is more than qualified to complete such a scholarly work. Beginning the catalogue with an essay on Barnes himself, Wattenmaker apparently felt compelled to defend the reputation of this irascible and sometimes antagonistic individual by deploying extensive quotations (from hitherto inaccessible archival documentation) that shed light on Barnes's motives.

Next are in-depth essays on William J. Glackens, Alfred Maurer, and others who have major works in the Barnes Foundation. The final section, "Additional Works by American Artists," is organized alphabetically. Each image is accompanied by extensive scholarly footnotes. The photographs are richly textured. The few photographs of the paintings hanging in situ provide a teasing glimpse into the experience of the visitor to Merion, Pennsylvania, the original home of this collection (soon to be closed to the public, in preparation for the museum's move to a new building in Philadelphia). Summing Up: Highly recommended. Lower-level undergraduates through faculty/researchers. Lower-division Undergraduates; Upper-division Undergraduates; Graduate Students; Researchers/Faculty. Reviewed by K. Mason.

*Political and Civic Leadership* Apr 28 2022 I jumped at the chance to shepherd this collection. This was personal for me. In the past, when I had prepared to teach courses on political leadership, I had come up with a dearth of recent scholarly attention to the topic. Perhaps my perspective on politics and leadership exacerbated the difficulty of my search. I had in mind a politics that touched all aspects of power and authority in our lives (not just government), encouraged the moral imagination, and affirmed human agency that could make the future better than the present. I searched with limited success for material that would explain how all of us shape and are shaped by politics. My perspective on leadership may have also hindered my search. I had in mind the simple notion of taking initiative on behalf of shared values. I found too little material about leadership that extended beyond the spectacle of authority and its assumption of hierarchy. I wanted to explain that each of us, regardless of our place in a hierarchy, has a calling to lead - to act on behalf of our moral imagination. Editing this volume permitted me the chance to develop the material I sought. I (as well as other teachers) no longer have a shortage of material relating politics and leadership with each other. From the Introduction
