National Safety Tractor and Machinery Operation Program Student Manual May 28 2022 The need for current and better quality training materials was cited by both certification program instructors and coordinators. In recognition of these shortcomings, the U. S. Department of Agriculture (USDA) funded a major project with Penn State University, The Ohio State University, and the National Safety Council to develop a National Safe Tractor and Machinery Operation Program (NSTMOP). The result is the NSTMOP Student Manual. This manual, including the task sheets, is the primary curriculum resource developed and designed to be used in a variety of instructional settings. The task sheets are divided into 6 sections: introduction; safety basics; agricultural hazards; the tractor; connecting and using implements with the tractor; and material handling (skid steers, ATV, and utility vehicles). There are a total of 77 task sheets, 48 are identified as core topics. Also included are a skills and driving test layout map and evaluation forms.

The Student's Handbook of Surgical Operations Jan 24 2022 Excerpt from The Student's Handbook of Surgical Operations The present work is intended for the use of students who are preparing for the final examinations, or who need a hand-book to assist them in carrying out operations upon the dead body. The book is abridged from the author's large "Manual of Operative Surgery." That work aims at dealing in an exhaustive manner with the whole subject of operative surgery, or of treatment by operation. This hand-book concerns itself only with the most essential and most commonly performed operations. All matters save such as deal with the actual technical details of operative surgery have been omitted. I have not discussed the general principles of operative surgery, nor have I entered into a critical consideration of the value of various methods. I have assumed that the reader is familiar with the anatomy of the district concerned in each section, and I have omitted all accounts of the after-treatment. I have given no description of instruments and have left untouched the subjects of mortality and results.
