Harvard A to Z Jun 28 2022 Open this book and step into the storied corridors of the nation's oldest university; encounter the historic landmarks and curiosities; and among them, meet the famous dropouts and former students, the world-class scholars, eccentrics, and prodigies

who have given the institution its incomparable character. An alphabetical compendium of short but substantial essays about Harvard University--its undergraduate college and nine professional schools--this volume traverses the gamut of Harvardiana from Aab and Admissions to X Cage and Z Closet. In between are some two hundred entries written by three Harvard veterans who bring to the task over 125 years of experience within the university. The entries range from essential facts to no less interesting ephemera, from the Arnold Arboretum designed by Frederick Law Olmsted to the peculiar medical specimens of the Warren Museum; from Arts and Athletics to Towers and Tuition: from the very

real environs (Cambridge, Charles River, and Quincy Street) to the Harvard of Hollywood and fiction. Harvard A to Z is a browser's delight, offering readers the chance to dip into the history and lore, the character and culture of America's foremost institution of higher learning. Burning the Books Oct 21 2021 The director of the famed Bodleian Libraries at Oxford narrates the global history of the willful destruction—and surprising survival—of recorded knowledge over the past three millennia. Libraries and archives have been attacked since ancient times but have been especially threatened in the modern era. Today the knowledge they safeguard faces purposeful destruction and willful neglect; deprived of funding, libraries are fighting for their very existence. *Burning the Books* recounts the history that brought us to this point. Richard Ovenden describes the deliberate destruction of knowledge held in libraries and archives from ancient Alexandria to contemporary Sarajevo, from smashed Assyrian tablets in Iraq to the destroyed immigration documents of the UK Windrush generation. He examines both the motivations for these acts—political, religious, and cultural—and the broader themes that shape this history. He also looks at attempts to prevent and mitigate attacks on knowledge, exploring the efforts of librarians and archivists to preserve information, often risking their own lives in the process. More than simply repositories for knowledge, libraries and archives inspire and inform citizens. In preserving notions of statehood recorded in such historical documents as the Declaration of Independence, libraries support the state itself. By preserving records of citizenship and records of the rights of citizens as enshrined in legal documents such as the Magna Carta and the decisions of the US Supreme Court, they support the rule of law. In *Burning the Books*, Ovenden takes a polemical stance on the social and political importance of the conservation and protection of knowledge, challenging governments in particular, but also society as a whole, to improve public policy and funding for these essential institutions.

Harvard University Press Dec 23 2021 A university press is a curious

institution, dedicated to the dissemination of learning yet apart from the academic structure; a publishing firm that is in business, but not to make money; an arm of the university that is frequently misunderstood and occasionally attacked by faculty and administration. Max Hall here chronicles the early stages and first sixty years of Harvard University Press in a rich and entertaining book that is at once Harvard history, publishing history, printing history, business history, and intellectual history. The tale begins in 1638 when the first printing press arrived in British North America. It became the property of Harvard College and remained so for nearly half a century. Hall sketches the various forerunners of the "real" Harvard University Press, founded in 1913, and then follows the ups and downs of its first six decades, during which the Press published steadily if not always serenely a total of 4,500 books. He describes the directors and others who left their stamp on the Press or guided its fortunes during these years. And he gives the stories behind such enduring works as Lovejoy's Great Chain of Being, Giedion's Space, Time, and Architecture, Langer's Philosophy in a New Key, and Kelly's Eleanor of Aquitaine and the Four Kings.

Catalogue of Irish Manuscripts in Houghton Library, Harvard University
Aug 19 2021 The first full account of North America's largest collection of traditional Irish-language manuscripts. Harvard University has the largest collection of Irish-language codices in North America, held in Houghton Library, its rare book repository. The manuscripts are a part of the age-old heritage of Irish book production, dating to the early Middle Ages. Handwritten works in Houghton contain versions of medieval poetry and sagas, recopied in the eighteenth and nineteenth centuries, to which period most of the library's documents belong. Contemporary writings from that time, as well as ones by the post-Famine Irish immigrant community in the United States, are included. This catalogue

describes the collection in full for the first time and will be an invaluable aid to research on Irish and Irish American cultural and literary output. The author's introduction examines how the collection was formed. This untold story is an important chapter in America's intellectual history, reflecting a phase of unprecedented expansion in Harvard University's scholarship and teaching during the early twentieth century when the institution's program of studies began to accommodate an increasing range of European languages and literatures and their sources. This indispensable guide to a major repository's records of the Irish past, and of America's Irish diaspora, will interest specialists in early and post-medieval codices. It should prove of relevance as well to scholars and students of comparative literature, cultural studies, and Irish and Irish American history.

Building State Capability Feb 10 2021 Introduction : the "long voyage of discovery" -- The big stuck in state capability -- Looking like a state : the seduction of isomorphic mimicry -- Premature load bearing : doing too much too soon -- Capability for policy implementation -- What type of organization capability is needed? -- The challenge of building (real) state capability for implementation -- Doing problem-driven work -- The searchframe : doing experimental iterations -- Managing your authorizing environment -- Building state capability at scale through groups.

Higher Learning Apr 26 2022 Examines the state of education in American universities, discusses recent developments in higher education, and suggests how universities can make greater contributions to students and society

How They Got Into Harvard Jun 24 2019 Describes the individual admissions process of fifty students accepted to the prestigious university, sharing strategies for identifying key talents, submitting the perfect application package, and improving networking skills.

All That She Carried Jul 26 2019 NATIONAL BOOK AWARD WINNER • NEW YORK TIMES BESTSELLER • A renowned historian traces the life

of a single object handed down through three generations of Black women to craft a “deeply layered and insightful” (The Washington Post) testament to people who are left out of the archives. WINNER: PEN/John Kenneth Galbraith Award, Anisfield-Wolf Book Award, Lawrence W. Levine Award, Darlene Clark Hine Award • ONE OF THE TEN BEST BOOKS OF THE YEAR: The Washington Post, Slate, Vulture, Publishers Weekly “A history told with brilliance and tenderness and fearlessness.”—Jill Lepore, author of *These Truths: A History of the United States* In 1850s South Carolina, an enslaved woman named Rose faced a crisis: the imminent sale of her daughter Ashley. Thinking quickly, she packed a cotton bag for her with a few items, and, soon after, the nine-year-old girl was separated from her mother and sold. Decades later, Ashley’s granddaughter Ruth embroidered this family history on the sack in spare, haunting language. Historian Tiya Miles carefully traces these women’s faint presence in archival records, and, where archives fall short, she turns to objects, art, and the environment to write a singular history of the experience of slavery, and the uncertain freedom afterward, in the United States. *All That She Carried* is a poignant story of resilience and love passed down against steep odds. It honors the creativity and resourcefulness of people who preserved family ties when official systems refused to do so, and it serves as a visionary illustration of how to reconstruct and recount their stories today FINALIST: Frederick Douglass Book Prize, Harriet Tubman Prize, MAAH Stone Book Award, Ralph Waldo Emerson Prize, Kirkus Prize, Mark Lynton History Prize, Cundill History Prize, Chataqua Prize ONE OF THE BEST BOOKS OF THE YEAR: The New York Times, NPR, Time, The Boston Globe, The Atlantic, The Atlanta Journal-Constitution, Smithsonian Magazine, St. Louis Post-Dispatch, Ms. magazine, Book Riot, Library Journal, Kirkus Reviews, Booklist

Harvard University Jan 24 2022 "The Harvard University Campus Guide is fascinating to read and an easy-to-use companion for a walking tour. It features over one hundred thirty buildings and spans four hundred years. With a foreword by Harvard's twenty-sixth president, Neil L. Rudenstine, and striking photographs by Richard Cheek, this is the

definitive guide to the history and architecture of the oldest and foremost institution of higher learning in the United State."--BOOK JACKET.

The Annual Report of the President of Harvard University to the Overseers on the State of the University for the Academic Year ... Jun 04 2020

The Founding of Harvard College Jul 30 2022 Pulitzer Prize-winning author Samuel Eliot Morison traces the roots of American universities back to Europe, providing "a lively contemporary perspective...a realistic picture of the founding of the first American university north of the Rio Grande" [Lewis Gannett, New York Herald Tribune].

Science at Harvard University Mar 14 2021 "This collection of original historical essays examines aspects of the relationship between science and the nation's oldest academic institution. This is history as viewed from the varying perspectives of a group of scholars for whom science at Harvard University is a significant component of their ongoing research. Thus, the essays are of specialist interest, while collectively the volume is a case study of science in an institutional setting. In conducting their research, the authors have used a wealth of primary sources from the Harvard Archives and other repositories." "The volume opens with a thematic introduction by Margaret Rossiter reflecting the picture of Harvard science drawn in the several papers in the volume, while suggesting ways in which a study of Harvard relates to and illuminates the history of science in America." "The subsequent papers follow a generally chronological sequence, beginning with Sara Schechner Genuth's study of attitudes toward comets in relation to early Harvard University programs and functions. Mary Ann James examines the beginnings of applied science at Harvard, and Bruce Sinclair continues that theme with a comparative study of MIT and Harvard." "Toby Appel's paper on zoologist Jeffries Wyman identifies the special part that personal character plays in institutional history. Curtis Hinsley concentrates on facilities and shows how the Peabody Museum gave rise to teaching in anthropology. David Livingstone's biographical treatment of Nathaniel S. Shaler reveals a number of intellectual strands running through the University in the late nineteenth century, and John

Parascandola's paper on L. J. Henderson likewise deals with a figure of wide influence and many interests, ranging from biochemistry to sociology. The latter topic leads to Lawrence Nichols's account of the rise of sociology at Harvard. A view of the internal tensions within psychology are seen in Rodney Triplet's study of Henry A. Murray." "I. Bernard Cohen examines the relations among Howard Aiken, IBM, and Harvard in the development of the Mark I computer, while Peggy Kidwell studies the Observatory community during World War II and its response to national defense and a developing federal support system." "Finally, Clark Elliott considers the history of Harvard science as a field for study through a review of published literature and archival sources and makes suggestions for further investigation."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Causal Inference May 04 2020 The application of causal inference methods is growing exponentially in fields that deal with observational data. Written by pioneers in the field, this practical book presents an authoritative yet accessible overview of the methods and applications of causal inference. With a wide range of detailed, worked examples using real epidemiologic data as well as software for replicating the analyses, the text provides a thorough introduction to the basics of the theory for non-time-varying treatments and the generalization to complex longitudinal data.

Explore Harvard Apr 14 2021 As part of its 375th celebration, the University has created a new photo book, *Explore Harvard: The Yard and Beyond*. This collection of photographs, including contemporary images never before published and archival prints, brings to life the myriad intellectual exchanges that make Harvard one of the world's leading institutions of higher education.

The Harvard Century Aug 31 2022 This text tells the story of how Harvard, America's oldest and foremost institution of higher learning has become synonymous with the nation, their goals and standards reflecting

each other, each setting the other's agenda. It is a narrative of the individual achievements of its leaders and of the intense power struggles that have shaped Harvard as it pioneered in setting the priorities that have served as exemplars for the nation's educational establishment. [The Harvard Book](#) Nov 02 2022 Essays from three hundred years of Harvard student life discuss the school's history, teachers, alumni, sports, traditions, and problems

Helgoland May 28 2022 Named a Best Book of 2021 by the Financial Times and a Best Science Book of 2021 by The Guardian "Rovelli is a genius and an amazing communicator... This is the place where science comes to life." —Neil Gaiman "One of the warmest, most elegant and most lucid interpreters to the laity of the dazzling enigmas of his discipline...[a] momentous book" —John Banville, *The Wall Street Journal* A startling new look at quantum theory, from the New York Times bestselling author of *Seven Brief Lessons on Physics*, *The Order of Time*, and *Anaximander*. One of the world's most renowned theoretical physicists, Carlo Rovelli has entranced millions of readers with his singular perspective on the cosmos. In *Helgoland*, he examines the enduring enigma of quantum theory. The quantum world Rovelli describes is as beautiful as it is unnerving. Helgoland is a treeless island in the North Sea where the twenty-three-year-old Werner Heisenberg made the crucial breakthrough for the creation of quantum mechanics, setting off a century of scientific revolution. Full of alarming ideas (ghost waves, distant objects that seem to be magically connected, cats that appear both dead and alive), quantum physics has led to countless discoveries and technological advancements. Today our understanding of the world is based on this theory, yet it is still profoundly mysterious. As scientists and philosophers continue to fiercely debate the meaning of the theory, Rovelli argues that its most unsettling contradictions can be explained by seeing the world as fundamentally made of relationships rather than substances. We and everything around us exist only in our interactions with one another. This bold idea suggests new directions for thinking about the structure of reality and even the nature of consciousness. Rovelli makes learning about quantum mechanics an

almost psychedelic experience. Shifting our perspective once again, he takes us on a riveting journey through the universe so we can better comprehend our place in it.

Civil Rights Queen Apr 02 2020 With the US Supreme Court confirmation of Ketanji Brown Jackson, “it makes sense to revisit the life and work of another Black woman who profoundly shaped the law: Constance Baker Motley” (CNN). The first major biography of one of our most influential judges—an activist lawyer who became the first Black woman appointed to the federal judiciary—that provides an eye-opening account of the twin struggles for gender equality and civil rights in the 20th Century. “A must-read for anyone who dares to believe that equal justice under the law is possible and is in search of a model for how to make it a reality.” —Anita Hill Born to an aspirational blue-collar family during the Great Depression, Constance Baker Motley was expected to find herself a good career as a hair dresser. Instead, she became the first black woman to argue a case in front of the Supreme Court, the first of ten she would eventually argue. The only black woman member in the legal team at the NAACP's Inc. Fund at the time, she defended Martin Luther King in Birmingham, helped to argue in Brown vs. The Board of Education, and played a critical role in vanquishing Jim Crow laws throughout the South. She was the first black woman elected to the state Senate in New York, the first woman elected Manhattan Borough President, and the first black woman appointed to the federal judiciary. Civil Rights Queen captures the story of a remarkable American life, a figure who remade law and inspired the imaginations of African Americans across the country. Burnished with an extraordinary wealth of research, award-winning, esteemed Civil Rights and legal historian and dean of the Harvard Radcliffe Institute, Tomiko Brown-Nagin brings Motley to life in these pages. Brown-Nagin compels us to ponder some of our most timeless and urgent questions--how do the historically marginalized access the corridors of power? What is the price of the ticket? How does access to power shape individuals committed to social justice? In Civil Rights Queen, she dramatically fills out the picture of some of the most profound judicial and societal change made in twentieth-century

America.

The Harvard University Catalogue Jan 12 2021

The Legacy of Slavery at Harvard Nov 29 2019 Harvard’s searing and sobering indictment of its own long-standing relationship with chattel slavery and anti-Black discrimination. In recent years, scholars have documented extensive relationships between American higher education and slavery. The Legacy of Slavery at Harvard adds Harvard University to the long list of institutions, in the North and the South, entangled with slavery and its aftermath. The report, written by leading researchers from across the university, reveals hard truths about Harvard’s deep ties to Black and Indigenous bondage, scientific racism, segregation, and other forms of oppression. Between the university’s founding in 1636 and 1783, when slavery officially ended in Massachusetts, Harvard leaders, faculty, and staff enslaved at least seventy people, some of whom worked on campus, where they cared for students, faculty, and university presidents. Harvard also benefited financially and reputationally from donations by slaveholders, slave traders, and others whose fortunes depended on human chattel. Later, Harvard professors and the graduates they trained were leaders in so-called race science and eugenics, which promoted disinvestment in Black lives through forced sterilization, residential segregation, and segregation and discrimination in education. No institution of Harvard’s scale and longevity is a monolith. Harvard was also home to abolitionists and pioneering Black thinkers and activists such as W. E. B. Du Bois, Charles Hamilton Houston, and Eva Beatrice Dykes. In the late twentieth century, the university became a champion of racial diversity in education. Yet the past cannot help casting a long shadow on the present. Harvard’s motto, Veritas, inscribed on gates, doorways, and sculptures all over campus, is an exhortation to pursue truth. The Legacy of Slavery at Harvard advances that necessary quest.

Considerations relative to the Library of Harvard University, respectfully submitted to the Legislature of Massachusetts Nov 09 2020

That Book about Harvard Dec 11 2020 "Eric Kester has written the kind of book I wish I had the courage and insight to write. His illuminations on everything from Larry Summers to the Harvard football team to cheating, tourists, and competitiveness are dead-on. His writing has also provided me with some of the best laugh-out-loud moments I've had in recent years. God knows Harvard could use some humor!"
—PETER OLSON, FORMER CEO OF RANDOM HOUSE, HARVARD GRADUATE, AND CURRENT HARVARD PROFESSOR One of the most thrilling and terrifying days of your life is the first day of college, when you step onto campus filled with the excitement of all the possibilities ahead—and panic about if you'll make it and how you'll fit in. Now imagine that same feeling, but you're in the middle of the lawn at the world's most prestigious university. In your underwear. Thus begins one of the craziest years ever at Harvard, in which Eric Kester finds himself in a cheating scheme, trying to join a prestigious Finals Club, and falling for a stunning type-A brunette...who happened to be standing there in shock that first day when he made his red-faced stroll across the Harvard Yard. That Book about Harvard is the hilarious and heartwarming story of trying to find your place in a new world, the unending quest to fit in, and how the moments that change your life often happen in the most unexpected ways. Eric Kester graduated from Harvard in 2008, where he wrote a popular column for the undergraduate newspaper, the *Crimson*. Now a featured writer for *CollegeHumor.com*, Eric has also contributed to the *Boston Globe*, *someEcards.com*, and *Dorkly.com*.

Three Centuries of Harvard, 1636-1936 Mar 26 2022 Samuel Eliot Morison sat down to tell the whole story of Harvard informally and briefly, with the same genial humor and ability to see the human implications of past events that characterize his larger, multi-volume series on Harvard.

A Catalogue of the Library of Harvard University in Cambridge, Massachusetts Jun 16 2021

Believing Nov 21 2021 "An elegant, impassioned demand that America see gender-based violence as a cultural and structural problem that hurts everyone, not just victims and survivors... It's at times downright virtuosic in the threads it weaves together."—NPR Winner of the 2022 ABA Silver Gavel Award for Books From the woman who gave the landmark testimony against Clarence Thomas as a sexual menace, a new manifesto about the origins and course of gender violence in our society; a combination of memoir, personal accounts, law, and social analysis, and a powerful call to arms from one of our most prominent and poised survivors. In 1991, Anita Hill began something that's still unfinished work. The issues of gender violence, touching on sex, race, age, and power, are as urgent today as they were when she first testified. *Believing* is a story of America's three decades long reckoning with gender violence, one that offers insights into its roots, and paths to creating dialogue and substantive change. It is a call to action that offers guidance based on what this brave, committed fighter has learned from a lifetime of advocacy and her search for solutions to a problem that is still tearing America apart. We once thought gender-based violence--from casual harassment to rape and murder--was an individual problem that affected a few; we now know it's cultural and endemic, and happens to our acquaintances, colleagues, friends and family members, and it can be physical, emotional and verbal. Women of color experience sexual harassment at higher rates than White women. Street harassment is ubiquitous and can escalate to violence. Transgender and nonbinary people are particularly vulnerable. Anita Hill draws on her years as a teacher, legal scholar, and advocate, and on the experiences of the thousands of individuals who have told her their stories, to trace the pipeline of behavior that follows individuals from place to place: from home to school to work and back home. In measured, clear, blunt terms, she demonstrates the impact it has on every aspect of our lives, including our physical and mental wellbeing, housing stability, political participation, economy and community safety, and how our descriptive language undermines progress toward solutions. And she is uncompromising in her demands that our laws and our leaders must

address the issue concretely and immediately.

Healthy Buildings Feb 22 2022 A healthy building does more than conserve resources: it improves the health and productivity of the people

inside. Joseph Allen and John Macomber look at everything from the air we breathe to the water we drink to how light, sound, and materials impact our performance and wellbeing and drive business profit.
