This is likewise one of the factors by obtaining the soft documents of this **Waldameer Park Images Of America** by online. You might not require more mature to spend to go to the books instigation as capably as search for them. In some cases, you likewise pull off not discover the broadcast Waldameer Park Images Of America that you are looking for. It will very squander the time.

However below, once you visit this web page, it will be in view of that agreed easy to acquire as competently as download guide Waldameer Park Images Of America

It will not allow many time as we notify before. You can realize it though con something else at home and even in your workplace. suitably easy! So, are you question? Just exercise just what we have enough money below as capably as evaluation **Waldameer Park Images Of America** what you with to read!

Florence Sep 07 2020 Originally known as Mansfield Township's High Banks section, the township of Florence incorporated in 1872. The early farming community was laid out in 1850 by the Florence City Company. It then became a resort area for Philadelphia's elite, who traveled upriver by steamboat or by train on the Camden and Amboy division of the Pennsylvania Railroad. The early population was largely Irish, coming to work in the Florence Iron Works, established in 1857. Originally the Jones Foundry, the ironworks produced cast-iron pipe, Mathews fire hydrants, and cylinders for Baldwin locomotives. The foundry is still operating and has been a mainstay of the community for nearly one hundred fifty years.

Novi Oct 28 2019 From a peaceful farming community to a thriving commercial suburb, Novi, Michigan, has undergone many periods of dramatic change, creating the rich history that is explored in this volume. This collection of over 200 photographs provides a fascinating record of the development of Novi through the 19th and 20th centuries. In the early days of westward exploration, the fertile land surrounding Detroit attracted the first settlers of Novi. The town grew quickly after the 1825 opening of the Erie Canal, and by 1830, a bustling business district had emerged. The major changes came in the 1950s, with the building of freeways that cut directly through the heart of Novi. The sudden easy access to Detroit and Lansing ensured the town's future as a true American suburb. Shopping centers soon followed in the tire tracks of the freeway, and the area rapidly expanded.

Jackson Heights Aug 07 2020 A fascinating part of the melting pot city, current day Jackson Heights in Queens, New York, the neighborhood formerly known as "Trains Meadow", is shared in images and history of the area from rural farmland to a cultural and economic center in New York. At the turn of the 20th century, the neighborhood known as Jackson Heights was originally called Trains Meadow, a sprawling area covered by acres of farmland and rolling hills. Its only inhabitants were homesteaders who lived in their ancient wood-framed dwellings with spreads occupied by barns, horse stables, cabbage patches, and beehives. Overgrowing populations in Manhattan and Brooklyn led developers to Queens County to transform that landscape into Jackson Heights. Headed

by Edward Archibald MacDougall, the ambitious Queensboro Corporation spent nearly \$4 million buying properties, molding roads, and constructing buildings of great architectural merit. Jackson Heights provides an in-depth look at the history of America's first garden apartment community with the use of never-before-seen photographs culled from local archives and private collections. Images featured show the neighborhood's progression from rural farmland to the highly populated economic center it is today with memorable businesses like Jahn's Ice Cream Parlor and the cultural splendor along Thirty-seventh Avenue and Eighty-second Street.

Northampton May 04 2020 As settlers began arriving in 1728 between the banks of today's Lehigh River and Hokendauqua Creek, three distinct hamlets known as Siegfried Bridge, Newport, and Stemton grew and prospered as an agricultural society. In 1902, the three became one, and the newly consolidated borough grew by the strength of its agriculture, and even more so with the discovery of calcium carbonate and its enduring legacy: cement. With the rise of the Atlas Cement Company as the world's largest cement plant, the industry found an international platform in Northampton. The local workforce of more than five thousand provided cement for the Panama Canal, the Empire State Building, and the Hoover Dam.

Orem Mar 26 2022 In 1861, a group of hardy pioneers ascended the "Provo Bench" that overlooks Utah Lake. With dreams of fruit orchards and vegetable fields, they uprooted the sagebrush, dug irrigation canals, and planted crops. These farms were successful, and they helped transform Orem into a dynamic community by the time the railroad arrived. The produce was boxed and shipped across Utah on the Orem Line, and the Provo/Orem area earned the nickname "Garden City of Utah." Incorporated in 1919, Orem was transformed again during World War II when the U.S. government constructed Geneva Steel Mill on the shores of Utah Lake. Blue collar workers joined farmers and ranchers in building a city. Orem supports higher education and is home to Utah Valley University. Although malls and subdivisions have replaced many of the orchards and the steel mill has closed, Orem remains rooted in its past while growing towards its future.

Miami Beach Sep 19 2021 Miami Beach began its rise to the top of the world's resort scene when Carl Fisher, builder of the Indianapolis Motor Speedway, arrived prior to 1920. The lure of "The World's Playground" was impossible to ignore for many, as hotels and restaurants flourished, even through the Great Depression. The images in this volume evoke poignant memories of Miami Beach's great past, almost inevitable downturn, and return to life with the discovery of South Beach and a renewed interest in art deco. Among the vintage views, most of which have never before been published, are early Lincoln Road and Washington Avenue; Miami Beach High School; Parham's; Junior's; Wolfies; Pumperniks; the first hotel on Miami Beach, Brown's; the Roney Plaza; the Fontainebleau; and, of course, the people who helped create this modern paradise.

Danville Jul 06 2020 Located in South Central Virginia on the North Carolina border, Danville remains one of the most dynamic destinations in the state. The geographic region that is now Danville was home to the Morotock Indians in the 1600s and frequented by traders as early as 1673. It was not until the late 1700s that the Virginia General Assembly was petitioned to establish a Tobacco Inspection Site along the Dan River. On November 23, 1793, the Assembly approved the request and decreed that 25 acres south of the river be founded as the Town of Danville. The city's first cotton mill was constructed in 1828, and five years later the town became the City of Danville. The town served as the last capital of the Confederacy during the Civil War and was also the site of the infamous "Wreck of the Old 97"--inspiration for the popular ballad. In the more than 200 years since its founding, Danville's rich history has been driven by tobacco and textile markets.

Montauk Jan 30 2020 Montauk, the easternmost hamlet in the town of East Hampton, is located at the end of Long Island--118 miles out to sea and surrounded on three sides by water. Location plays the most important role in the history of Montauk. The land of Montauk and its various uses--pastureland for over 300 years; a private resort for Arthur Benson and friends; a center of coastal navigation and defense from the time of the Revolutionary War to the Cold War; exceptional, modern-day fishing grounds, where the converging tide of the Atlantic Ocean and the Block Island Sound create a natural funnel for fish; and a world-renown resort that began with Carl Fisher--will

be explored herein. Great measures have been taken to preserve as much of Montauk as possible, with over 70 percent of the land now designated as New York State Parks, Suffolk County preserves, and East Hampton reserved land to be enjoyed in perpetuity.

Lincoln Jan 12 2021 Lincoln was founded in 1754, when colonists in Concord and parts of Lexington and Weston joined together to form a new town. Judge Chambers Russell, Concord's representative to the General Court, christened the town Lincoln after his beloved family home of Lincolnshire, England. Shown in this pictorial of more than two hundred never-before-published photographs culled from historic archives and family collections, Lincoln evolves from its early days as a thriving agricultural community, through gentrification into country estates owned by wealthy Bostonians, to its present status as a pioneer in open-space preservation and conservation. Lincoln is a treasure trove for longtime residents and visitors alike who want to experience a New England town restore, recycle, and reinvent itself.

Newburyport Jun 04 2020 Formerly the smallest city in Massachusetts, Newburyport is considered to be one of the architectural gems of New England. Its history, both public and private, is intertwined with and expressed by its structures. Newburyport was incorporated in 1764 when it broke away from the early settlement of Newbury, which was founded in 1635 by English livestock investors. The port supplied England with large timbers for shipbuilding in the 1700s. As international trade grew, many merchants acquired great wealth, which in turn helped build the city. The devastating fire of 1811 prompted building ordinances requiring non-wooden material, and the beautiful, Federal-period brick structures in the downtown area are the result. Today Newburyport is an historical destination, the consummation of years of work in architectural preservation, enriched by Yankee, European, and French-Canadian cultures.

Essex Aug 31 2022 Essex is nestled on the Atlantic coast within beautifully preserved hills, forest, fields, and wetlands—but the serene landscape belies the town's rich history. According to tradition, the first Essex boat was built in an attic around 1660. Eventually, this shipbuilding industry would create a thriving town as it developed into one of the largest producers of fishing schooners in the country. By its incorporation in 1819, Essex was a renowned community of fishing, farming, shipbuilding, and other industries. Over time, Essex became the birthplace of the fried clam, sent a native son to the baseball major leagues, acquired a Paul Revere church bell, and raised a barn that is now the oldest still in use in America. With a newly gathered collection of vintage images, Essex reveals a microcosm of American culture and growth, telling the story of leading patriots, entrepreneurs, Civil War heroes, and hardworking everyday citizens.

Harpers Ferry Nov 21 2021 Harpers Ferry, West Virginia, sits in the shadow of the Blue Ridge Mountains at the confluence of two rivers, the Potomac and Shenandoah. Without the influence of John Brown and his raiders, Meriwether Lewis of Lewis and Clark fame, and Thomas Jefferson, Harpers Ferry might have remained a sleepy little village. Instead, it became a frequently contested location for troops during the Civil War and changed hands eight times. Many of the current shops and restaurants are housed in the restored original buildings, built in the 1800s. A visit to Harpers Ferry is like stepping back in time to the year 1859, because the town has been restored to that period. It has been designated a National Historical Park, with many buildings owned and maintained by the National Park Service.

Londonderry Jun 16 2021 Situated only forty miles north of Boston, Londonderry is one of the fastest growing towns in a rapidly developing region of New England. With the opening of Interstate 93 in 1963, the town's transformation from rural farming community to metropolitan suburb began. Today, as progress inevitably changes the appearance of Londonderry, the town strives to maintain its small-town appeal and rich agricultural heritage. In words and pictures, Londonderry captures the character of the town from the mid-nineteenth century through World War II. Included are early photographs of farms, homesteads, and taverns that have changed very little, and many more photographs of mills, churches, barns, and rail depots that disappeared years ago. Londonderry is also a record of people engaged in a more simple way of life—apple picking, collecting maple syrup, bringing in the hay, and tobogganing on Ela's Hill (now the site of a fast-food restaurant).

Londonderry tells a fascinating story to be enjoyed by lifelong residents and newcomers alike.

Manayunk Jan 24 2022 Manayunk, the Native American word for "place where we drink," was first explored by Dutch and English surveyors in the late seventeenth century. These early explorers found the area, which expands upward from the banks of the Schuylkill River, to be quite fascinating. In later years, Manayunk's rolling hills, slanting lawns, and clusters of houses, mills, and church spires stood out and made the neighborhood a unique section of Philadelphia, reminiscent of Italy or southern France. Manayunk explores the growth of the region from a river town with a population of sixty to its rise as "the Manchester of America," akin to the British town of the same name. A manufacturing mecca noted for its mills along its immigrant-dug canal, Manayunk has an indomitable spirit that helped the town triumph over floods and the Depression of 1929. A place of fascinating oddities, one of the first buildings in Manayunk was a gin mill. Manayunk looks at the building of the grand canal, which in 1825 was filled with arks and square-toed flat-bottomed boats. In the summer, the canal became a roughshod rendition of Venice, with its long boats pointed at both ends carrying grains and produce while being poled up the canal by Philadelphia gondoliers. Also illustrated is the construction of the elevated Reading Railroad line and the disarray this engineering feat brought to the town. Notable citizens, such as Capt. John Towers ("the Father of Manayunk"), members of the Levering family, Samuel Streeper Keely, Seville Schofield, James Milligan, and William B. Nickels, are also profiled.

Oregon Shakespeare Festival Nov 02 2022 In 1935, Angus Bowmer, an instructor at Southern Oregon Normal School in Ashland, began with a dream and a small coterie of devoted friends who believed, as he did, in the value of Shakespeare performed on an Elizabethan stage. Though the Oregon Shakespeare Festivals early platforms were rudimentary and the backstage areas primitive, the art drew enthusiastic audiences. The urgency of World War II closed the festivals doors, but in 1947 it reopened with larger theater facilities and an expanded repertory, winning the support and respect of state, regional, and national artists and dignitaries. In a setting of extraordinary beauty and a community dedicated to culture and the arts, the 75-year-old Oregon Shakespeare Festival (OSF) is among the largest and most influential professional regional theaters in North America.

Westfield May 28 2022 Westfield is a thriving suburban community, rich in history, culture, and civic pride. Located just 22 miles outside of New York City, it is affectionately known as "Colonial Westfield." In 1720, the "West Fields" of Elizabeth Town were settled by English immigrants. During the Revolutionary War, several altercations with the Red Coats took place here. Not only did George Washington stop in Westfield during the Revolutionary War, but it is believed he slept at the home of one of the town's forefathers. After the advent of the railroad in mid-1800s, the small but productive farming village gradually developed into the attractive upscale community it is today. Known for its high standards in education, emphasis on the arts, and religious and civic institutions, Westfield is one of the few suburban towns in New Jersey that continues to maintain an active downtown shopping area, complete with a major department store. With approximately 50 restaurants, it draws visitors from all over the state.

Zion Oct 01 2022 Zion did not spring up by chance along a rolling river or upon a hilltop. The land in which Zion City planted its roots was sought out by a surveying team and then purchased by Dr. John Alexander Dowie for the sole purpose of building a religious utopia. Before the first spade of soil was turned, attention was given to every detail, from utilities to commercial areas and educational institutions and (most importantly) the temple. In less than a decade, Dowie and his followers built a self-sufficient theocracy that sheltered its inhabitants from the outside world. Indeed, Zion boasts a unique history and is a most intriguing study in the successes and failures of a planned city of God.

Broadway Nov 09 2020 From its origins as a Native American trail to its iconic status in global culture today, Broadway tells the story of New York as it grew from a Dutch colony into a world-class city. Broadway has been the site of many firsts and many superlatives: the first subway line in the city, the tallest buildings, and one of the longest streets in the world. Beginning along the winding streets of the original settlements amid the skyscrapers of the Financial District, Broadway

heads north through the neighborhoods of SoHo and Greenwich Village. It then traverses some of the city's most famous plazas, including Flatiron, Herald Square, Times Square, and Columbus Circle, before entering Upper Manhattan and passing institutions like Lincoln Center, Columbia University, and City College. Today, Broadway continues to be at the forefront of New York City's urban developments.

Winthrop Jul 30 2022 It has been referred to as the "Little Republic" and the "Jewel of the North Shore," but to local residents both current and past, the small peninsular town of Winthrop will always be home. Winthrop's insularity and geographic position as a natural barrier between Boston and the Atlantic has created a unique place to live-and the best kept secret around-a place to enjoy the spectacle of the sea, the folksiness of a small town and, with its proximity to Boston, a pinch of urban sensibility. Winthrop explores the fascinating and diverse history of the town, first as an early Native American habitat and then as the site of Colonial agrarians, wealthy landowners, and a copper works. It takes you to the waterfront, which became a magnet for tourists; the yacht clubs and hotels that opened; and the beach activities that became a passion for sweltering city dwellers. Winthrop shows how, from the American Revolution through the Cold War, the town played host to the military, having forts, cannons, radar, and tunnels, and how the town nearly had the distinction of having the world's first electric transit system, a monorail, which met a mysterious demise days before the start of construction.

Arlington Oct 09 2020 Over the decades of the twentieth century, Arlington experienced a dramatic transformation from a simple, rural community known as Alexandria County into a complex, bustling, urban center, one with a cityscape of high-rise apartments and commercial buildings. Though many know of the area's Civil War-era connections, some of Arlington's most compelling and relevant history has taken place not under a divided union, but across the twentieth-century landscape, a time of unparalleled population growth, ethnic diversification, and economic development. This volume, with over 180 black-and-white photographs, takes readers on a unique visual journey into the Arlington of yesteryear and documents its evolving face over the twentieth century. Through this unique pictorial retrospective, readers will explore some of the county's early villages, such as Glencarlyn, Queen City, Cherrydale, and Barcroft, and will enjoy viewing the transition from the early trolley lines and Washington & Old Dominion Railroad, which first brought growth to the area, to an era known for the development associated with Metro. A visual treasure, Arlington contains scenes of Fairlington, Buckingham, and other developments that housed thousands of new residents beginning in the 1930s; images of places where residents shopped and worked, such as Parkington and Clarendon; and photographs depicting the urban development of Rosslyn, Crystal City, and Ballston.

Harrisburg Apr 14 2021 Harrisburg, the capital of Pennsylvania, boasts a rich and fascinating history. Known for its unique beauty, the city played a vital role in agriculture, shipping, and politics from colonial times through the American Revolution, the Civil War, and beyond.

Lewiston Feb 10 2021 Lewiston, Idaho, started with wild beginnings and stayed that way for generations. Officially founded in 1861, its origins are born from a gold rush. When gold was discovered up the river in a neighboring town called Pierce, it brought hopeful miners from near and far panning up and down the river. From that population sprang a tent city that would become Lewiston, along with the stories that informed of Lewiston's early history and growth, full of gambling, drinking, wild women, and the occasional murder. This volume covers Lewiston's history, beginning with its official founding in 1861 and expanding the history through the early 1970s, while focusing on the town's heyday in the 1950s.

Rancho Cucamonga Oct 21 2021 Located at the base of the San Gabriel Mountains near the southern end of the Cajon Pass, Rancho Cucamonga has served as a natural crossroads for those traveling to and from Southern California. In 1776, while freedom was being declared on the east coast of North America, Spanish explorers were meeting native Cucamonga Indians for the first time. From that point on, Spanish missionaries, pioneers, gold miners, immigrants, settlers, and businessmen traveled through Cucamonga on the Mojave Trail, the Old Spanish Trail, the Santa Fe

Trail, El Camino Real, and more recently, former U.S. Route 66. While some continued on, others stayed and built farms, vineyards, and more. Italian immigrants, attracted by stories of Cucamonga's ideal soil and climate, planted vast vineyards of Italian grape stock and produced many world-famous wines. Although Cucamonga's heyday of grapes and winemaking spanned a century, little wine is produced today. Now Rancho Cucamonga attracts people as an excellent place to live. Money magazine placed it in the top 100 in its "Best Places to Live" rankings in 2006.

Sumter County Aug 19 2021 Sumter County was founded on December 18, 1832, on land ceded to the United States by the Choctaw Indians in the Treaty of Dancing Rabbit Creek. Almost immediately, settlers began pouring in from Georgia, Virginia, Tennessee, and the Carolinas. In the 19th and early-20th centuries, most of the residents were farmers; however, following the infestation of the boll weevil, many turned to raising cattle and growing timber. Every November, hundreds of hunters descend upon Sumter County in hopes of harvesting one of the thousands of deer that live on the rolling prairies and in the oak forests lining the Tombigbee River. With the help of Ruby Pickens Tartt, scores of ethnomusicologists, including John and Alan Lomax, traveled hundreds of miles to the red clay country of Sumter County in the 1930s, 1940s, and 1950s to record African American folk songs from people like Vera Hall and Dock Reed.

Huntington Dec 11 2020 Huntington, West Virginia, is a city rich in cultural history. Rising from the ashes of the Civil War, this jewel city of the upper South became an important focus of the nation's industrial elite. With the Industrial Revolution, Huntington evolved into a major shipping port for the boundless reserves of coal, virgin timber, and natural gas found in the local mountains. The great railroad scion Collis P. Huntington, who had just completed the Transcontinental Railroad, became obsessed with creating a new city-one that bears his name today. Images of America: Huntington conveys the opulence of the Gilded Age (1870-1915) in the stunning architecture and the graceful, elegant lifestyles of the time. Many of the wealthy families of Huntington contributed to the development of education and the community by building universities and public schools, as well as hospitals, libraries, churches, museums, and government buildings. This photographic journal offers an engaging history of the early families and that made Huntington one of the architectural gems of America.

Doylestown May 16 2021 In 1682, William Penn offered the "Free Society of Traders" a nearly twenty-thousand-acre tract of land made up from the then communities of Warwick, New Britain, and Hilltown. The area grew slowly and, in 1745, William Doyle applied for permission to operate an inn at a well-traveled crossroads. With the permission granted, Doyle's town was created. Spared destructive battles of the American Revolution, the town retained its rustic charm and appeal. By the beginning of the nineteenth century, Doylestown, as it had become known, had blossomed and was beginning to attract merchants and residents. It spent the next century somewhat in isolation until wealthy Philadelphians and New Yorkers "discovered" the borough in the 1930s, boasting of its abundant, beautiful, land and rich history. Doylestown is the first collection of images to document the history of the seat of Bucks County. The images contained in this collection were gathered primarily from local residents who, upon hearing of the pending publication, came forth with troves of photographs, stories, and memories of their hometown. Truly a community effort, Doylestown is a unique compilation of a storied past, a spirited present, and an exciting future.

New Port Richey Jun 24 2019 New Port Richey, Florida, like many cities between Jacksonville and Tampa, can thank Henry Plant's 1885 railroad for its phenomenal growth. Thirty-five miles northwest of Tampa, in West Pasco County, New Port Richey eventually hosted its own railway connection right through downtown. City planners constructed the community in a grid, naming north-south streets after Presidents and east-west streets after states. The arrival of the U.S. Post Office in 1915 confirmed this city's importance and put New Port Richey on the map. Hotels, banks, and businesses sprang up in the downtown area to serve those who came in search of a better life. Fishing on the Pithlachascotee River and in the Gulf of Mexico attracted many visitors, as did the construction of golf courses. Businessmen then and now recognized that this area had "that special something" to catch the attention and the hearts of people from all states north of Florida.

Dunstable Dec 31 2019 Incorporated on October 16, 1673, Dunstable, Massachusetts, was purchased from the Wameset and Naticook Indians for UK 20AA sterling. It was named in honor of Mrs. Edward Tyng, who had emigrated from a community of the same name in England. The Tyngs were early founders of Dunstable, a town that began in hardship. Every house in Dunstable began as a watch house, and every man was a soldier. Dunstable men were among the first to prepare for the American Revolution, and many were sent to fight in the Civil War. Discover the details of this early history in an unprecedented collection of images compiled by local historians Susan Tully and Susan Psaledakis. The images in this collection date as far back as 1743 and span a period of two centuries. Included are pictures of the many historic homes in Dunstable as well as notable people and events in the community.

Big Sur Jul 26 2019 Big Sur is a river and a region on California's Central Coast. Extending for 75 miles along the Pacific shore, from south of Carmel to north of San Simeon, the Big Sur Coast is defined by the backdrop of the rugged Santa Lucia Mountains as they abruptly descend to meet the sea. For millennia the home of native people, Americans and Europeans began to settle Big Sur country even before California became a state. This book combines outstanding photographs from 40 collections, ranging from family albums to institutional archives.

Sherman Mar 02 2020 Sherman was founded in 1846, but because of a lack of wood and water, the town moved east to its present location in 1848. The county seat of Grayson County, Sherman was named for Gen. Sidney Sherman, a hero of the Texas Revolution. From the beginning, Sherman was known as an educational center and was nicknamed "The Athens of Texas." The home of Kidd-Key Conservatory of Music, Mary Nash College, North Texas Male and Female Academy, Carr-Burdette College, and today the prestigious Austin College, Sherman has long been an educational mecca. Sherman was incorporated in 1858, the same year the Butterfield-Overland Stage arrived. The stage line was the first mail route west of the Mississippi and covered a distance of 2,795 miles from St. Louis to San Francisco. As Sherman progressed, industry became a mainstay of the community, which continues to thrive today through companies such as Texas Instruments, GlobiTech, Sunny Delight, Progress Rail, Tyson Foods, Fisher Controls, Kaiser Aluminum, and CertainTeed Corporation.

Long Beach Jun 28 2022 In 1906, Sen. William H. Reynolds purchased an abandoned barrier island along the south shore of Long Island and vowed to turn it into a great city. What is now Long Beach, the "City by the Sea," soon drew visitors who came for its summer resorts, boardwalk, dance pavilions, casino, and luxury hotels. Two world wars, Prohibition, and easy railroad access turned summer residences into year-long homes for thousands eager to live by the seaside and raise families in what has been known as "America's Healthiest City." The images of Long Beach reflect the diversity of the city's architecture, culture, religions, and unique neighborhoods. Photographs show the storied inhabitants and bungalows of the West End, water-lined homes of the canals, the 2.1-mile boardwalk, and long white sand beach.

Milford Nov 29 2019 In 1670, Puritan pioneers colonized the Nipmuck Indian territory that would develop into the town of Milford, officially incorporated in 1780. Its advantageous location between the Mill and Charles Rivers created a convenient commercial center. By 1850, major railway lines traversed routes to Boston and New York, enabling Milford to develop the largest boot-and-shoe industry in the nation. When pink granite was discovered in the late 1800s, Milford's stone business boomed. The quarries and factories attracted skilled European immigrants who made the area home. The community grew, establishing cultural commitments to education, music, and athletics. Dr. Joseph E. Murray, winner of the Nobel Prize in Medicine, and Col. Alexander Scammell, a hero of the Revolutionary War, were both sons of Milford. Today, Milford continues to prosper with successful businesses like Consigli Construction, Archer Rubber, and Waters Corporation. The town is also noted for the Milford Regional Medical Center, which ranks as a premier facility in New England.

Northwest Bronx Mar 14 2021 Northwest Bronx is home to Wave Hill, Van Cortlandt Park, Woodlawn Cemetery, the New York Botanical Garden, and a variety of colleges and universities. Hunter College served as a training facility during World War II, and Mark Twain, Theodore

Roosevelt's family, and Arturo Toscanini once lived at Wave Hill. Pres. John F. Kennedy's boyhood home is only steps from Wave Hill, and George Washington slept at the Van Cortlandt Mansion. Northwest Bronx features an array of vintage photographs of the borough's neighborhoods, from Spuyten Duyvil, Kingsbridge, Riverdale, and Woodlawn to the neighborhoods north of Fordham Road and west of the Bronx River.

Mountain View Apr 02 2020 Known today as a leading center of technological innovation, Mountain View's modern Silicon Valley landscape hides a rich history stretching back to the 1850s.

Kansas City, Kansas Aug 26 2019 Over the past 150 years, many of the consumer goods sold and used across the country were either manufactured in Kansas City, Kansas, or passed through this industrial center. From the westbound trails of pioneer times until today, Kansas has been the crossroads of the nation, and the city has benefitted from its geographic centrality in the country. Household names with ties to the city include Google; Cerner Corporation; Procter & Gamble; General Motors; Colgate-Palmolive; the Santa Fe, Rock Island & Union Pacific Railroad lines; Phillips Petroleum; Armour and Company; Owens Corning; Massey Ferguson; General Electric; Sunshine Biscuits; Lee (apparel); Sealy (mattresses); and United Telecom (which morphed into Sprint Nextel). Images of America: Kansas City, Kansas aims to present some of that historic past, much of which has long been demolished, so that modern readers may see the complete, "full service" city as it evolved between 1804 and 2012.

St. Augustine Dec 23 2021 St. Augustine conjures up images of Spanish architecture, a massive fort, splashes of color against a backdrop of river and ocean, and always, always the omnipresent tourist. This ancient town, established along the banks of the Matanzas River in 1565, is the oldest city in America. Founded to protect Spains trade route from South and Central America to Europe, this colorful community was thriving years before the Pilgrims landed on Plymouth Rock and decades before Jamestown was settled. No other place in the United States embodies more charm than this hallowed city. Within these pages, images taken from the St. Augustine Historical Societys archives will educate, enthrall, and entice history buffs, tourists, and residents alike. These vintage photographs will link readers to the past and transform them into more than mere spectators visiting a popular tourist attraction. Rediscover the Spanish connection and see how early settlers built their homes, harvested their crops, educated their children, and protected their land. Walk the same worn and winding paths that the towns forefathers trod and acknowledge both the good and the bad times of life before modernday conveniences. St. Augustine conjures up images of Spanish architecture, a massive fort, splashes of color against a backdrop of river and ocean, and always, always the omnipresent tourist. Walk the same worn and winding paths that the towns forefathers trod and acknowledge both the good and the bad times of life before modernday conveniences.

Louisville Sep 27 2019 Since its founding at the Falls of the Ohio by George Rogers Clark in 1778, Louisville and its people have looked to the mighty Ohio River as the city's lifeblood. Louisville has counted on the river for transportation, commerce, leisure, culture, and natural beauty. Characterized by abundant opportunity-both professional and recreational-this renowned city has grown and prospered to become the business and industrial center of Kentucky. Is Louisville the southernmost midwestern town, or is it an upper south, southern city? This identity crisis has arisen from a historical diversity of people, industries, architecture, and commerce. Louisville has been home to large populations of German, Irish, French, and other immigrants. Large multi-national

corporations, such as General Electric, Brown Forman, Philip Morris, and UPS have also called Louisville home over the years. The city counts among its famous sons William Clark, who, with Merriwether Lewis, led the Lewis and Clark Expedition in 1803, and sports icon Muhammad Ali. Local streets boast modern architectural treasures such as the Humana Building, designed by Michael Graves, and the American Life Building by Mies van der Rohe. Louisville is also home to Churchill Downs and the country's premier equestrian competition, the Kentucky Derby. These and many other notable facets of the city's rich heritage are illuminated in the vintage photographs within this volume. Concentrating on the early twentieth century, *Images of America: Louisville* celebrates a dynamic community and the people, both famous and everyday, who have contributed to its lasting legacy.

Wilkes-Barre Jul 18 2021 Wilkes-Barre, founded in 1769, is a city of changes: environmental changes brought on by the Susquehanna River and industrial changes that transformed a quiet farming community into a busy breaker town. When anthracite coal was discovered in the 1800s and massive coal breakers were built, immigrants from eastern, western, and southern Europe began to arrive. As these immigrants arrived, they changed the face of the city, creating their own communities and hamlets. Fortunately for the citizens of the Wyoming Valley, changes continue today, thanks to many forward-thinking men and women who see the potential in something old and take the time to make it new again.

Monroe Apr 26 2022 Originally a parish of the Stratford Congregational Church, Monroe was sanctioned in 1762 as the New Stratford Ecclesiastical Society. In 1789, both the New Stratford Parish and the Ripton Parish were incorporated under the name of Huntington. It was not until May of 1823 that Monroe was granted township privileges by the Connecticut General Assembly. This act joined the separate villages of Stepney, Monroe Centre, East Village, and the area now known as Stevenson into a single entity known as the Town of Monroe, named for President James Monroe. In January 1959, a group of residents, concerned over the growing signs of changes to their town, came together to establish the Monroe Historical Society. They recognized that their rural farming community would succumb to the advancement of suburban development, and unless something was done, Monroe's early years would exist only in the memories of older residents. In the ensuing years, the Society has aspired to make the heritage of Monroe available to all residents through its collections, workshops, and educational programs. Keeping in mind that today is tomorrow's history, the Society is expanding its collections so that future generations will be able to see Monroe's changes from a rural community to the suburban town it is today.

Colorado Springs Feb 22 2022 This pictorial history shows the transition of Colorado Springs from a frontier town, founded in 1871 by William Jackson Palmer, to those years just prior to the city's explosive growth which started during World War II.
