Arts - Therapies - Communication **European Arts Therapy** Dec 01 2019 The theoretical and practical formation of European Art Therapy as a discipline requires establishing communication with theorists and practitioners in other continents or countries. Accomplishing this requires two approaches. A more theoretical approach uses European Art Therapy as a research and teaching tool. A more practical approach seeks experiences in common, as well as quantitative and qualitative investigations, which in turn lead to theoretical-methodical conclusions. The contributions in this volume employ both approaches. Individual articles cannot, of course, fully describe the extent of art therapy throughout Europe, but they are a source of information and inspiration for readers. Whether theorists or practitioners, readers will find articles that address their particular concerns, enabling them to find tools they can use in their own specific work. The State of Public Management Aug 01 2022 Public management stands at the unique intersection of theory and practice. It seeks to help scholars frame questions that will improve

their understanding of how policy ideas become transformed into practice and to help government managers see past the narrow issues on their desks to the broader implications of their work. In *The State of Public Management*, Donald F. Kettl and H. Brinton Milward bring together contributors who focus on the interdisciplinary nature of public management. Scholars from the social sciences—economics, political science, sociology, and psychology—examine what traditional disciplines bring to the debate. Other analysts build on this foundation to probe the theoretical bases of and practical solutions for public management.

Psychological Criminology Oct 30 2019 *Psychological Criminology* addresses the question: what is it about individuals and their experiences that cause them to commit crime and/or to become criminal? This book provides a comprehensive coverage of psychological theories of crime and criminality, exploring theories focusing on factors present at birth (human nature, heredity); theories that focus on factors that influence the offender over the lifespan (learning, development); and theories focusing on factors present at the crime scene. It emphasizes the connections among the different approaches, and demonstrates how, taken together rather than as rival explanations, they provide a more complete picture of crime and criminality than each provides individually. Theories are arranged throughout the book in a temporal sequence, from distal to proximal causes of crime. The analysis spans 100,000 years, from the evolutionary roots of criminal behaviour in the ancestral environments of early humans on the African savana, to the decision to engage in a specific criminal act. Key features of the book include: a focus on theory – ‘explaining’ crime and criminality, an integrative approach, accessible to readers who do not have a background in psychology. *Psychological Criminology* highlights the contributions that psychological theory can make to the broader field of criminology; it will be of interest to students, academics, researchers and practitioners in both criminology and forensic psychology.

Human Trafficking Dec 25 2021 Human trafficking involves the violation of societal norms and often activates criminal justice responses including police, courts, juvenile justice, and child protective services. Due to the complex nature of human trafficking, some behaviours that facilitate human trafficking cannot be easily identified and assigned to conventional crime categories. As a result of this complexity, criminologists have yet to fully explore the problem of human trafficking. In recent years, however, there has been a growing interest among criminologists in human trafficking and its intersections with the criminal justice system and overlap with conventional types of crime. This edited collection of research aims to underscore these intersections in order to further improve the description, explanation, and prevention of human trafficking. Research contained in this book provides a step forward by describing police perceptions and responses to human trafficking while also providing insight into victims with reports on victim perceptions of their treatment by the police. Most notably, this volume has moved research on human trafficking beyond descriptive frequencies to sophisticated multivariate analyses. This book was originally published as a special issue of the *Journal of Crime and Justice*.

Social Problem Solving and Offending Oct 11 2020 The evidence for social problem solving deficits being relevant to the understanding and treatment of offending behaviour has been accumulating since the 1980s. Reasoning and Rehabilitation (R&R), the first structured cognitive-behavioural treatment programme used widely with prisoners, included social

problem solving as a key component and is now in use worldwide. More recently, interventions that focus specifically on social problem solving have recently been developed. Arranged in three parts (evidence, evaluation and evolution and exploration), this book draws together aetiological and therapeutic research evidence and practice over the last twenty years in social problem-solving with offenders.

Care of the Mentally Disordered Offender in the Community Sep 29 2019 The thoroughly revised second edition of *Care of the Mentally Disordered Offender in the Community* is a comprehensive, evidence-based guide to the latest developments in the social context, management, and treatment of offenders in mental health care. In recent years there has been significant changes in the public perception of crime and the mentally ill offender, enhanced by research into causal links between violence and mental illness, and the increased publicity of the risk mentally disordered offenders could pose to the community. These, and other various factors, have significantly increased service development and research into psychological and pharmacological treatments and the rate of re-offending. Over three sections this essential guide explores key topics for discussion in the field. Part One critically examines the social, administrative and clinical context within which care is given in the modern day. Part Two discusses treatment and the evaluation of risk when determining the most appropriate treatment, whilst Part Three explores psychiatric services and their relationship with other agencies. Fully updated to ensure new areas for discussion are included, this book includes new chapters on relevant debates in the field such as US provision for the mentally disordered leaving prison, community management of sexual offending, the relationships between care and coercion, and the treatment of personality disorders. Written and edited by a global team of experts in the field, this book provides readers with useful insight into the social, clinical, and institutional contexts of this complex and relevant issue.

Foundations of Offender Rehabilitation Feb 24 2022 The past three decades has seen dramatic changes in the way in which the criminal justice system responds to those who break the law. The old claim in the field of correctional psychology that "nothing works" has strongly been refuted in the face of evidence from rehabilitation programmes that do make a difference. The graduate student in forensic psychology could easily be overwhelmed by the plethora of information now available. This new textbook offers a comprehensive approach to forensic and correctional psychology, demonstrating how theory and practise can be applied and integrated. Written by intentionally recognized experts within the field, the authors guide the students through the core theories and concepts that underpin forensic practise within the legal systems of different countries (UK, USA, Canada, Australia and Singapore), show how this knowledge informs current thinking in offender rehabilitation and reintegration and provide a series of case studies looking at sexual offenders, female offender, juveniles and offenders with mental disorders. This book is the perfect overview for graduate students of forensic and correctional psychology engaged with offender rehabilitation and assessment and the psychology of law.

Sex Offenders and the Internet Mar 28 2022 Online, the opportunity to commit a crime is never more than a few clicks away. *Sex Offenders and the Internet* explores the nature of online sex offenders in order to help practitioners understand and treat this new category of client. Kerry Sheldon and Dennis Howitt examine the research base by reviewing case studies and psychological profiles, with a particular focus on paedophilic Internet sex offenders. Issues covered include child pornography, the often overlooked 'excuses' for paedophilia, and how we can move forward. The result is a book that comprehensively details the nature of Internet sex offenders, bringing together the relevant research into one essential volume.

The Rehabilitation of Sexual Offenders Jan 02 2020 Sexual offenders – arguably the most hated and feared of all offenders – commit their crimes in our communities and are then hidden from public view as they serve long prison sentences. However, despite the public's understandable anxiety, our criminal justice systems hold to the premise that almost all offenders have the right to hope for rehabilitation, even redemption. Therefore the majority of sexual offenders return to live in our communities, closely monitored by criminal justice agencies and subject to rigorous controls. This book provides an authoritative guide to working with sexual offenders, with a focus on managing those who are reintegrating into the community. It includes those with the most striking histories of trauma and psychological difficulty, and those who have previously failed in their attempts at resettlement. It covers helpful theoretical ideas, such as attachment theory and models of desistance, as well as the latest evidence base for good quality risk assessment. The book supports practitioners on the front line of this work by providing them with evidence-based guidance. It presents a multitude of case examples and practice tips that can support effective decision making and achieve safe outcomes, as well as help such offenders build worthwhile community lives.

Cognition and Crime Apr 04 2020 The rational choice perspective developed by Cornish and Clarke in 1986 provides criminologists with a valuable and practical framework for purposes of crime control and prevention. More than twenty-five years later, *Cognition and Crime* pushes the boundaries of this field of research by bringing together international leading (or emerging) researchers in this area of script analysis into a single volume for the first time. It also presents a series of original contributions on offender decision-making during crime and crime script analysis as well as offering a critical perspective of what could be achieved in the future to further help develop this field of research for prevention purposes. In addition, each empirical chapter treats a specific and important form of crime such as stalking violence, drug dealing, human trafficking for sexual exploitation, child sexual abuse, and transnational illegal market of endangered species. Academics and students from various backgrounds, and interested in investigating and preventing crime, will benefit from this book as it applies crime script analysis and discusses new and future developments in regards to this approach and the rational choice perspective. This volume will be

of particular relevance for practitioners such as police officers and crime investigators.

Exploring High-risk Offender Treatment and the Role of Music Therapy May 30 2022 Exploring High-risk Offender Treatment and the Role of Music Therapy explores the treatment delivered to high-risk offenders with complex needs, focusing on sex and violent offenders. The book advocates for the further use of less traditional and creative therapies, in particular, music therapy. The higher the risk, the greater the needs. Offenders with complex needs have a range of factors impacting their abilities and well-being including mental health and learning disorders. Importantly, high-risk offenders commonly present with complex needs and, therefore, require treatment that is highly responsive. Guiding this book is the existing literature and qualitative research, conducted by the author, that sought to gain the perspectives and experiences of practitioners in the field. This included 38 interviews with those that deliver treatment to high-risk offenders and music therapy. This book examines the components of high-risk offender treatment, highlighting the effective elements and the limitations found within the literature and from the perspective of interviewed practitioners. Offering insight into less traditional therapies, the book presents literature surrounding mindfulness, psychodrama and art therapy for high-risk offenders. It is argued that there has been a recent shift towards a creative corrections approach, where less traditional therapies are gaining recognition within offender treatment, as they offer unique and supportive benefits to traditional treatment. This book focuses on examining the role of music therapy for high-risk offenders, mainly through a critical discussion on the relevant literature and qualitative practitioner data. Advocating the further implementation of creative corrections approaches, this book will be of great interest to academics and researchers within the fields of offender treatment and penology, as well as forensic psychologists and those studying or practicing music therapy.

Sex Crimes and Sex Offenders May 18 2021 *Sex Crimes and Sex Offenders: Research and Realities* provides an overview of social scientific theory and research on sex crimes and sex offenders. Most other books on the market are focused on a single issue—such as treatment, rape, pedophilia, theory, etc. This book is unique in that it covers the most current theory and research along with individual cases of sex crimes (e.g., Kobe Bryant, Jerry Sandusky, and other case studies), effectively linking theory and research with the realities of sex crimes and sex offenders as well as their victims. Vandiver, Braithwaite, and Stafford are careful to dispel myths and to focus on the heterogeneity of sex crimes and sex offenders, and not on any one issue or population or theory. Instead, they weave a framework using a full range of theoretical concepts and research data to integrate their discussions of crimes, offenders, victims, treatments, and policy implications. The result is a valuable resource for students and early-stage researchers investigating sex crimes or offenders.

Remaking Relapse Prevention with Sex Offenders Jun 18 2021 It is estimated that relapse prevention methods are employed in more than 90% of all North American sex offender treatment programs (of which there are more than 2,000). This sourcebook provides clinicians with the most current, practical, useable information about working with sex offenders to prevent relapse. It reflects the advances and insights of the past decade since the publication of *Relapse Prevention with Sex Offenders*, focusing on the major reconceptualizations, revisions, and innovations that will chart treatment programs for the first decade of the new millennium.

The final chapters will sketch out the practical implications of ITSO for risk assessment and treatment.

Individual Psychological Therapies in Forensic Settings Jul 08 2020 From the 'nothing works' maxim of the 1970s to evidence-based interventions to challenge recidivism and promote pro-social behavior, psychological therapy has played an important role in rehabilitation and risk reduction within forensic settings in recent years. And yet the typical group therapy model isn't always the appropriate path to take. In this important new book, the aims and effectiveness of individual therapies within forensic settings, both old and new, are assessed and discussed. Including contributions from authors based in the UK, North America, Europe, Australia and New Zealand, a broad range of therapies are covered, including Cognitive Behavioural Therapy, Mentalisation Based Therapy, Schema Therapy, Acceptance and Commitment Therapy and Compassion Focussed Therapy. Each chapter provides: an assessment of the evidence base for effectiveness; the adaptations required in a forensic setting; whether the therapy is aimed at recidivism or psychological change; the client or patient characteristics it is aimed at; a case study of the therapy in action. The final section of the book looks at ethical issues, the relationship between individual and group-based treatment, therapist supervision and deciding which therapies and therapists to select. This book is essential reading for probation staff, psychologists, criminal justice and liaison workers and specialist treatment staff. It will also be a valuable resource for any student of forensic or clinical psychology.

Sexual Violence and Restorative Justice Jan 14 2021 Concerned by the high attrition rates for sexual crime and the secondary victimization experienced by victims during their participation in the criminal justice system, this book analyses the extent to which restorative justice can address the justice gap that exists in current justice provision. Building on clinical experience and earlier research on sexual crime the authors engage with the complex dynamics and traumatic impact of sexual crime as a critical starting point for their

research and examine whether restorative justice can contribute to a more enhanced justice response. The book presents extensive new data on restorative justice as applied in sexual violence cases across the globe. It engages with feminist concerns regarding the traumatic impact of sexual violence and the power imbalances that characterise these offences, as well as the potential for re-traumatisation and re-victimisation during the judicial process. While there is a risk of coercion of the victim to participate in the process, and manipulation of restorative justice by the offender, restorative justice has the potential to lead to the reprivatisation of sexual crime and ultimately to its decriminalisation. Having examined these topics in detail, the book concludes there is an important role for restorative justice in addressing the justice gap that exists after sexual crime and offers guidance on how this can be achieved.
