Plato and the Creation of the Hebrew Bible Jul 12 2021

Plato and the Creation of the Hebrew Bible for the first time compares the ancient law collections of the Ancient Near East, the Greeks and the Pentateuch to determine the legal antecedents for the biblical laws. Following on from his 2006 work, Berossus and Genesis, Manetho and

Exodus, Gmirkin takes up his theory that the Pentateuch was written around 270 BCE using Greek sources found at the Great Library of Alexandria, and applies this to an examination of the biblical law codes. A striking number of legal parallels are found between the Pentateuch and Athenian laws, and specifically with those found in Plato's Laws of ca. 350 BCE.

Constitutional features in biblical law, Athenian law, and Plato's Laws also contain close correspondences. Several genres of biblical law, including the Decalogue, are shown to have striking parallels with Greek legal collections, and the synthesis of narrative and legal content is shown to be compatible with Greek literature. All this evidence points to direct influence from Greek writings, especially Plato's Laws, on the biblical legal tradition. Finally, it is argued that the creation of the Hebrew Bible took place according to the program found in Plato's Laws for creating a legally authorized national ethical literature, reinforcing the importance of this specific Greek text to the authors of the Torah and Hebrew Bible in the early Hellenistic Era. This study offers a fascinating analysis of the background to the Pentateuch, and will be of interest not only to biblical scholars, but also to students of Plato, ancient law, and Hellenistic literary traditions.

Binding Chaos: Mass Collaboration on a Global Scale Dec 05 2020 The world is long overdue for a completely new system of governance. If there was ever a need for political representation or a paternalistic and opaque authority, it has been removed by technology. Every political system we have tried has proven incapable of protecting human rights and dignity. Every political system we have tried has devolved into

oligarchy. To effect the change we require immediately, to give individuals control and responsibility, to bring regional systems under regional governance, allow global collaboration and protect the heritage of future generations, we need a new political model.

The Trouble with Unity Jan 06 2021 "Cristina Beltran's powerful book *The Trouble with Unity* is timely for our age of Obama in which an ugly anti-immigrant spirit looms large. Don't miss it!"---Cornel West, Princeton University --

And God Said... Nov 23 2019 Do you dismiss the existence of God because of the popular attitude ridiculing the creation story and the garden of Eden story in the Bible, claiming there is no basis in science for it to be true? Author Ruth Anne Carpenter takes on a new approach to the age-old mystery of creation in *And God Said: A Study of Creation and the Garden of Eden*. She skillfully incorporates the science behind God's creation of the earth-the land, the waters, the vegetation, the

animals-the moon, the sun, and finally man and woman to show readers that science and Christianity can in fact coexist. Carpenter then outlines the remaining individual verses of these prophecies, exploring the meaning and impact of the first marriage between Adam and Eve and their eventual banishment from the garden of Eden after succumbing to the power of Satan and partaking of the forbidden fruit from the tree of the knowledge of good and evil. Ruth Anne Carpenter has written an enlightening study of creation that reconciles scientific studies with spiritual truth. It will encourage you to investigate into your own soul and explore your own faith more fully. Ruth Anne Carpenter lives in Newport News, Virginia, with her husband of thirty-three years. She has embraced her faith and has studied the Bible her whole life.

Creation of Wing Chun Nov 16

2021 This book explores the social history of southern Chinese martial arts and their contemporary importance to local identity and narratives of resistance. Hong Kong's Bruce Lee ushered the Chinese martial arts onto an international stage in the 1970s. Lee's teacher, Ip Man, master of Wing Chun Kung Fu, has recently emerged as a highly visible symbol of southern Chinese identity and pride. Benjamin N. Judkins and Jon Nielson examine the emergence of Wing Chun to reveal how this body of social practices developed and why

individuals continue to turn to the martial arts as they navigate the challenges of a rapidly evolving environment. After surveying the development of hand combat traditions in Guangdong Province from roughly the start of the nineteenth century until 1949, the authors turn to Wing Chun, noting its development, the changing social attitudes towards this practice over time, and its ultimate emergence as a global art form."

Inventing Witchcraft Aug 21 2019
When the first edition of this book was released, conservative Gardnerian Witches attempted to suppress it, claiming that it discredited their religion. Dr. Aidan A. Kelly has thoroughly investigated the history, rituals, and documents behind the evolution of modern Witchcraft, and has concluded that Gerald Gardner invented Wicca as a new religion. Although Wicca claims to be a persecuted pagan religion dating from before the rise of Christianity, it draws upon controversial historical sources, modern occult practices, including those of Alistair Crowley and the Hermetic Order of the Golden Dawn, 19th century translations of medieval grimoires, and the poetry of Gardner's priestess, Doreen Valiente. This extensively revised edition contains new research which was unavailable at the time, as well

as detailed textual comparisons of Gerald Gardner's own manuscripts, magical books, and rituals that could not be included in the earlier edition.

The Creation of Sacred Literature Jun 23 2022

The Creation of Iraq, 1914-1921 May 10 2021 With the U.S.-led Operation Iraqi Freedom, we are reminded that almost one hundred years ago, Great Britain undertook a similar process of regime change and territorial reorganization in the same region of the world. In the thick of world conflict, with its strategic interests in the balance, the British had to begin planning for the aftermath of the World War that permitted the redrawing of borders and the creation of new political entities. One year after the beginning of World War I, preparations for a new strategic order in the Middle East were already underway. For the Allies -Britain, France, and Russia -the task was different from that of the United States today. Yet unlike the Coalition forces that in

2003 proclaimed the territorial integrity of Iraq, the British began from scratch: until 1921, the country of Iraq did not exist. How did this actually come about? And what were the reactions of the peoples living in that contested territory? This collection of essays by leading scholars provides a comprehensive yet accessible overview of Iraq's history and its strategic importance from three points of view: local residents, Iraq's neighbors (Iran, Turkey, and Kurdistan), and the Great Powers. The book captures the complexity of forces that contributed to the making of Iraq as a modern state, integrating short and long term policy, individual and group interests, and the impact of World War I. *The Creation of Iraq* helps readers to understand the dynamics and interplay of regional history and geo-strategic and imperial priorities in an area of the world that will continue to dominate international politics for years to come. - Publisher. [Roger Sherman and the](#)

Creation of the American Republic Feb 07 2021 One of leading figures of his day, Roger Sherman was a member of the five-man committee that drafted the Declaration of Independence and an influential delegate at the Constitutional Convention. As a Representative and Senator in the new republic, he had a hand in determining the proper scope of the national government's power as well as drafting the Bill of Rights. In Creation of the American Republic, Mark David Hall explores Sherman's political theory and shows how it informed his many contributions to America's founding. A close examination of Sherman's religious beliefs provides insight into how those beliefs informed his political actions. Hall shows that Sherman, like many founders, was influenced by Calvinist political thought, a tradition that played a role in the founding generation's opposition to Great Britain, and led them to develop political

institutions designed to prevent corruption, promote virtue, and protect rights. Contrary to oft-repeated assertions that the founders advocated a strictly secular policy, Hall argues persuasively that most founders believed Christianity should play an important role in the new American republic. Metaphysics Sep 26 2022 "This book does nothing less than to set new standards in combining philosophical with political theology. Pabst's argument about rationality has the potential to change debates in philosophy, politics, and religion." (from the foreword) This comprehensive and detailed study of individuation reveals the theological nature of metaphysics. Adrian Pabst argues that ancient and modern conceptions of "being" or individual substance fail to account for the ontological relations that bind beings to each other and to God, their source. On the basis of a genealogical account of rival theories of creation and individuation from Plato to postmodernism, Pabst

proposes that the Christian Neo-Platonic fusion of biblical revelation with Greco-Roman philosophy fulfills and surpasses all other ontologies and conceptions of individuality.

[The Creation of Me, Them and Us](#) Mar 08 2021 From the author of Binding Chaos, this book brings us back to the beginning. The beginning of designing a better method of governance and way of living is to look at the structure of our self. The scope and originality of this book present a radical challenge to a seldom examined worldview. With an extremely wide reach and richness of detail, The Creation of Me, Them and Us sets the stage for further discussions of institutional reform by tackling the fundamental questions of who are we, what do we want, and why do we act the way we do? These questions (and answers) are fundamental in understanding a world that may seem incomprehensible today.

The Creation of Man Oct 27 2022 I have focused on the

idea of man in creation and have tried to clarify it. Perhaps there is as much confusion and uncertainty here as anywhere today, even in Christian ranks. There is confusion and uncertainty of the beginning of man, was he created as man as of today or did he evolve from an ape? Also, there are other things that confuse and seem uncertain to man that I tried to point out in this study. The idea of God is being attacked in many ways and in many quarters. But there seems to be, also, a growing recognition of man's need of God. Man within himself is helpless in the midst of hostile forces on every hand. God is man's only refuge and help in time of need. I feel that man should know about his total self, and relationship with God. I will try to point out and focus on studies of man before the world was created, the three-folds of man's nature and functional parts, his fall and punishment, and also his renewal stages and his final destiny.

The Age of Homespun May 22 2022 They began their existence as everyday objects, but in the hands of award-winning historian Laurel Thatcher Ulrich, fourteen

domestic items from preindustrial America—ranging from a linen tablecloth to an unfinished sock—relinquish their stories and offer profound insights into our history. In an age when even meals are rarely made from scratch, homespun easily acquires the glow of nostalgia. The objects Ulrich investigates unravel those simplified illusions, revealing important clues to the culture and people who made them. Ulrich uses an Indian basket to explore the uneasy coexistence of native and colonial Americans. A piece of silk embroidery reveals racial and class distinctions, and two old spinning wheels illuminate the connections between colonial cloth-making and war. Pulling these divergent threads together, Ulrich demonstrates how early Americans made, used, sold, and saved textiles in order to assert their identities, shape relationships, and create history.
