A Dictionary of Cebuano Visayan Jul 01 2022 This is a dictionary of Cebuano Visayan, the language of the central part of the Philippines and much of Mindanao. Although the explanations are given in English, the aim of this work is not to provide English equivalents but to explain Cebuano forms in terms of themselves. It is meant as a reference work for Cebuano speakers and as a tool for students of the Cebuano language. There is a total of some 25,000 entries and an addenda of 700 forms which were prepared after the dictionary had been composed. This dictionary is the product of eleven years work by more than a hundred persons. The work was edited by John Wolff but the sources are entirely native, and all illustrations are composed by native speakers. To date, this work probably represents the most authoritative dictionary of the Cebuano Visayan language.

Educational Reform in Post-Soviet Russia Apr 05 2020 This volume consists of a collection of essays devoted to study of the most recent educational reform in Russia. In his first decree Boris Yeltsin proclaimed education a top priority of state policy. Yet the economic decline which accompanied the collapse of the Soviet Union dealt a crippling blow to reformist aspirations, and to the existing school system itself. The public lost faith in school reform and by the mid-1990s a reaction had set in. Nevertheless, large-scale changes have been effected in finance, structure, governance and curricula. At the same time, there has been a renewed and widespread appreciation for the positive aspects of the Soviet legacy in schooling. The essays presented here compare current educational reform to reforms of the past, analyze it in a broader cultural, political and social context, and study the shifts that have occurred at the different levels of schooling "from political decision-making and changes in school administration to the rewriting textbooks and teachers' everyday problems. The authors are both Russian educators, who have played a leading role in implementation of the reform, and Western scholars, who have been studying it from its very early stages. Together, they formulate an intricate but cohesive picture, which is in keeping with the complex nature of the reform itself. [Higher Is Waiting](#) Oct 31 2019 In this intimate book of inspiration, Tyler Perry writes of how his faith has sustained him in hard times, centered him in good times, and enriched his life. Higher Is Waiting is a spiritual guidebook, a collection of teachings culled from the experiences of a lifetime, meant to inspire readers to climb higher in their own lives and pull themselves up to a better, more fulfilling place. Beginning with his earliest memories of growing up a shy boy in New Orleans, Perry recalls the moments of grace and beauty in a childhood marked by brutality, deprivation, and fear. With tenderness he sketches portraits of the people who sustained him and taught him indelible lessons about integrity, trust in God, and the power of forgiveness: his aunt Mae, who cared for her grandfather, who was born a slave, and sewed quilts that told a story of generations; Mr. Butler, a blind man of remarkable dignity and elegance, who sold penny candies on a street corner; and his beloved mother, Maxine, who endured abuse, financial

hardship, and the daily injustices of growing up in the Jim Crow South yet whose fierce love for her son burned bright and never dimmed. Perry writes of how he nurtured his dreams and discovered solace in nature, and of his resolute determination to reach ever higher. Perry vividly and movingly describes his growing awareness of God's presence in his life, how he learned to tune in to His voice, to persevere through hard times, and to choose faith over fear. Here he is: the devoted son, the loving father, the steadfast friend, the naturalist, the philanthropist, the creative spirit—a man whose life lessons and insights into scripture are a gift offered with generosity, humility, and love.

Forensic Archaeology Dec 02 2019 Forensic archaeology is mostly defined as the use of archaeological methods and principles within a legal context. However, such a definition only covers one aspect of forensic archaeology and misses the full potential this discipline has to offer. This volume is unique in that it contains 57 chapters from experienced forensic archaeological practitioners working in different countries, intergovernmental organisations or NGOs. It shows that the practice of forensic archaeology varies worldwide as a result of diverse historical, educational, legal and judicial backgrounds. The chapters in this volume will be an invaluable reference to (forensic) archaeologists, forensic anthropologists, humanitarian and human rights workers, forensic scientists, police officers, professionals working in criminal justice systems and all other individuals who are interested in the potential forensic archaeology has to offer at scenes of crime or places of incident. This volume promotes the development of forensic archaeology worldwide. In addition, it proposes an interpretative framework that is grounded in archaeological theory and methodology, integrating affiliated behavioural and forensic sciences.

The Routledge Companion to Commedia dell'Arte May 07 2020 From Commedia dell'Arte came archetypal characters that are still with us today, such as Harlequin and Pantalone, and the rediscovered craft of writing comic dramas and masked theatre. From it came the forces that helped create and influence Opera, Ballet, Pantomime, Shakespeare, Moliere, Lopes de Vega, Goldoni, Meyerhold, and even the glove puppet, Mr Punch. The Routledge Companion to Commedia dell'Arte is a wide-ranging volume written by over 50 experts, that traces the history, characteristics, and development of this fascinating yet elusive theatre form. In synthesizing the elements of Commedia, this book introduces the history of the Sartori mask studio; presents a comparison between Gozzi and Goldoni's complicated and adversarial approaches to theatre; invites discussions on Commedia's relevance to Shakespeare, and illuminates re-interpretations of Commedia in modern times. The authors are drawn from actors, mask-makers, pedagogues, directors, trainers and academics, all of whom add unique insights into this most delightful of theatre styles. Notable contributions include: • Donato Sartori on the 20th century Sartori mask • Rob Henke on form and freedom • Anna Cottis on Carlo Boso • Didi Hopkins on One Man, Two Guv'nors • Kenneth Richards on acting companies • Antonio Fava on Pulcinella • Joan Schirle on Carlo Mazzone-Clementi and women in Commedia • and M.A. Katritzky on images Oly Crick is a performer, trainer and director, having trained in Commedia under Barry Grantham and Carlo Boso. He is founder of The Fabulous Old Spot Theatre Company. Judith Chaffee is Associate Professor of Theatre at Boston University, and Head of Movement Training for Actors. She trained in Commedia with Antonio Fava, Julie Goell, Stanley Allen Sherman, and Carlos Garcia Estevez.

Physics on Manifolds May 31 2022 This volume contains the proceedings of the Colloquium "Analysis, Manifolds and Physics" organized in honour of Yvonne Choquet-Bruhat by her friends, collaborators and former students, on June 3, 4 and 5, 1992 in Paris. Its title accurately reflects the domains to which Yvonne Choquet-Bruhat has made essential contributions. Since the rise of General Relativity, the geometry of Manifolds has become a non-trivial part of space-time physics. At the same time, Functional Analysis has been of enormous importance in Quantum Mechanics, and Quantum Field Theory. Its role becomes decisive when one considers the global behaviour of solutions of differential systems on manifolds. In this sense, General Relativity is an exceptional theory in which the solutions of a highly non-linear system of partial differential equations define by themselves the very manifold on which they are supposed to exist. This is why a solution of Einstein's equations cannot be physically interpreted before its global behaviour is known, taking into account the entire hypothetical underlying manifold. In her youth, Yvonne Choquet-Bruhat contributed in a spectacular way to this domain stretching between physics and mathematics, when she gave the proof of the existence of solutions to Einstein's equations on differential manifolds of a quite general type. The methods she created have been worked out by the French school of mathematics, principally by Jean Leray. Her first proof of the local existence and uniqueness of solutions of Einstein's equations inspired Jean Leray's theory of general hyperbolic systems.

Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition Jan 03 2020 Recently, technology and aging have been key research areas in human cognition. The Research Topic "Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition" investigated technology's impact on cognitive and intellectual processes, highlighting how intensively technology can change and/or enhance the cognitive functioning throughout one's lifespan. The aim of this Research Topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind, and technology. Our scope was 1) to favor the cognitive technology debate, 2) to overcome the dichotomies of technology and psychology, 3) to emphasize the advances in knowledge and well-being. This Research Topic comprises review studies and original articles, focused on digital skills that enhance human potential. Transversal approaches and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing—in educational, rehabilitation, clinical settings—across aging. Articles of high relevance to the Research Topic were submitted on the subjects of a) research in human performance and human factors, b) new

research and technologies addressing the needs of a growing populace, and c) cognitive aging and cognitive rehabilitation research.

The Making of a New Science Aug 22 2021 This book explains the development of theoretical computer science in its early stages, specifically from 1965 to 1990. The author is among the pioneers of theoretical computer science, and he guides the reader through the early stages of development of this new discipline. He explains the origins of the field, arising from disciplines such as logic, mathematics, and electronics, and he describes the evolution of the key principles of computing in strands such as computability, algorithms, and programming. But mainly it's a story about people – pioneers with diverse backgrounds and characters came together to overcome philosophical and institutional challenges and build a community. They collaborated on research efforts, they established schools and conferences, they developed the first related university courses, they taught generations of future researchers and practitioners, and they set up the key publications to communicate and archive their knowledge. The book is a fascinating insight into the field as it existed and evolved, it will be valuable reading for anyone interested in the history of computing.

The Value of Worthless Lives May 19 2021 There are many good books on Italian immigration to the United States, including success biographies, field researches and historical investigations. What is lacking however is an account of the immigrant experience from a "grassroots" point of view. This book tells the stories of a normal people, the great majority of the immigrant population, through their own, sometimes almost illiterate, words. With this book I aim to contribute to this country's story of immigration with these first-hand accounts of those who lived it, first-generation immigrants. It was said once, by Giuseppe Prezzolini, that Italian immigration left tears and sweat but not "words." The material of this book proves such arrogance wrong. I tried to be as thorough as possible in my field research looking for such "words" on both sides of the Ocean. I consulted Italian and American archives, I looked for books out of print, and scavenged for unpublished ones in private houses and forgotten drawers. What I found fills a silence and gives a wider spectrum of the immigrant experience, from the miner to the tailor, from the janitor to the professor. The book will interest scholars of Italian immigration because it adds information from within the protagonists' self. Their tales may be average, their memory may be inaccurate but their drive toward a new life and their immigrant "philosophy," made of grinding teeth and hope, is all there in its most fresh features. The book will also interest scholars of the autobiographical genre because it adds a new facet to the autobiographical voice. There are only a few studies on the life writing of the lower class (which come from France and England, not the US). I have tried to formulate new concepts that describe the autobiographical "I" of these works, conc
