Managing Diversity in Singapore May 19 2021 Singapore society is increasingly becoming diverse. During the first few decades of nation building, policies were designed to homogenise aspects of Singaporean society while enshrining principles to allow restricted amounts of diversity. Fast forward to the present, and fifty years after independence, the number of areas where diversity is profoundly apparent remains copious, and its manifestations more varied. This book provides an updated account on the tensions posed by diversity in Singapore and how this is being managed, primarily by the state through policies and programmes but also by communities who attempt to negotiate these tensions. Such an enquiry is crucial especially at this juncture when the nation is finding ways to embrace the different forms of diversity brought about through external impetuses, as well as manage internal reactions from the

various communities. The book chapters highlight important considerations if Singapore's diversity management strategies will hold promise for the future. Contents:

[Higher Education, Meritocracy and Inequality in China](#) Jul 29 2019 This book investigates the changing opportunities in higher education for different social groups during China's transition from the socialist regime to a market economy. The first part of the book provides a historical and comparative analysis of the development of the idea of meritocracy, since its early origins in China, and in more recent western thought. The second part then explores higher education reforms in China, the part played by supposedly meritocratic forms of selection, and the implications of these for social mobility. Based on original empirical data, Ye Liu sheds light on the socio-economic, gender and geographical inequalities behind the meritocratic façade of the Gaokao (高考). Liu argues that the Chinese philosophical belief in education-based meritocracy had a modern makeover in the Gaokao, and that this ideology induces working-class and rural students to believe in upward social mobility through higher education. When the Gaokao broke the promise of status improvement for rural students, they turned to the Chinese Communist Party and sought political connections by actively applying for its membership. This book reveals a bleak picture of visible and invisible inequality in terms of access to and participation in higher education in contemporary China. Written in

an accessible style, it offers a valuable resource for researchers and non-specialist readers alike.

Where You Go Is Not Who You'll Be Nov 24 2021 Read award-winning journalist Frank Bruni's New York Times bestseller: an inspiring manifesto about everything wrong with today's frenzied college admissions process and how to make the most of your college years. Over the last few decades, Americans have turned college admissions into a terrifying and occasionally devastating process, preceded by test prep, tutors, all sorts of stratagems, all kinds of rankings, and a conviction among too many young people that their futures will be determined and their worth established by which schools say yes and which say no. In *Where You Go is Not Who You'll Be*, Frank Bruni explains why this mindset is wrong, giving students and their parents a new perspective on this brutal, deeply flawed competition and a path out of the anxiety that it provokes. Bruni, a bestselling author and a columnist for the New York Times, shows that the Ivy League has no monopoly on corner offices, governors' mansions, or the most prestigious academic and scientific grants. Through statistics, surveys, and the stories of hugely successful people, he demonstrates that many kinds of colleges serve as ideal springboards. And he illuminates how to make the most of them. What matters in the end are students' efforts in and out of the classroom, not

the name on their diploma. Where you go isn't who you'll be. Americans need to hear that--and this indispensable manifesto says it with eloquence and respect for the real promise of higher education.

The Official Guide to Medical School Admissions Aug 02 2022

[Blackballed](#) Jun 07 2020 "College" is a word that means many things to many people: a space for knowledge, a place to gain lifelong friends, and an opportunity to transcend one's socioeconomic station. Today, though, this word also recalls a slew of headlines that have revealed a dark and persistent world of racial politics on campus. Does this association disturb our idealized visions of

what happens behind the ivied walls of higher learning? It should-because campus racism on college campuses is as American as college football on Fall Saturdays. From Lawrence Ross, author of *The Divine Nine* and the leading expert on sororities and fraternities, *Blackballed* is an explosive and controversial book that rips the veil off America's hidden secret: America's colleges have fostered a racist environment that makes them a hostile space for African American students. *Blackballed* exposes the white fraternity and sorority system, with traditions of racist parties, songs, and assaults on black students; and the universities themselves, who name campus buildings after racist men and women. It also takes a deep dive into anti-affirmative action policies, and how they effectively segregate predominately white universities, providing ample room for white privilege. A bold mix of history and the current climate, *Blackballed* is a call to action for universities to make radical changes to their policies and standards to foster a better legacy for all students.

The Tyranny of the Meritocracy Nov 05 2022 A fresh and bold argument for revamping our standards of "merit" and a clear blueprint for creating collaborative education models that strengthen our democracy rather than privileging individual elites Standing on the foundations of America's promise of equal opportunity, our universities purport to serve as engines of social mobility and practitioners of

democracy. But as acclaimed scholar and pioneering civil rights advocate Lani Guinier argues, the merit systems that dictate the admissions practices of these institutions are functioning to select and privilege elite individuals rather than create learning communities geared to advance democratic societies. Having studied and taught at schools such as Harvard University, Yale Law School, and the University of Pennsylvania Law School, Guinier has spent years examining the experiences of ethnic minorities and of women at the nation's top institutions of higher education, and here she lays bare the practices that impede the stated missions of these schools. Goaded on by a contemporary culture that establishes value through ranking and sorting, universities assess applicants using the vocabulary of private, highly individualized merit. As a result of private merit standards and ever-increasing tuitions, our colleges and universities increasingly are failing in their mission to provide educational opportunity and to prepare students for productive and engaged citizenship. To reclaim higher education as a cornerstone of democracy, Guinier argues that institutions of higher learning must focus on admitting and educating a class of students who will be critical thinkers, active citizens, and publicly spirited leaders. Guinier presents a plan for considering "democratic merit," a system that measures the success of higher education not by the

personal qualities of the students who enter but by the work and service performed by the graduates who leave. Guinier goes on to offer vivid examples of communities that have developed effective learning strategies based not on an individual's "merit" but on the collaborative strength of a group, learning and working together, supporting members, and evolving into powerful collectives. Examples are taken from across the country and include a wide range of approaches, each innovative and effective. Guinier argues for reformation, not only of the very premises of admissions practices but of the shape of higher education itself.

Admissions by Design

May 31 2022 The race to matriculate into the most-prestigious-university-possible is killing America's students. There is a better way! Admissions by Design is a poignant, unorthodox, and thorough guide that upends the traditional paradigm of college admissions. Incorporating the latest research in brain science and human development and using stories from her nearly 20 years of work with students, Lisa Fisher offers students practical tools to reframe the college admissions process to one of an inspired and authentic journey toward self-discovery. Building from the root of the word "admission," meaning "toward purpose," and tying the college admissions process to the development of self and to emerging trends in economic development, the author argues that the admissions process shouldn't be about getting into a prestigious "name" school, but about a journey to knowing one's self, heeding one's callings, and identifying the "right fit" school that will serve as the catalyst to embracing a purpose-led life. Presenting facts and details about the ways in which the current system of college admissions negatively impacts

students, the author challenges prevailing methods and offers new ideas and solutions to reinvent the approach to college admissions to be more humanistic and student-centered. This practical guide challenges students to define and pursue their unique paths and offers hands-on tools to help students in their process of self-discovery and in identifying and applying to the "right fit" college.

**Critical Perspectives on the
College Admissions Process**

Oct 24 2021 Today, it may seem like the college admissions process has become more inflated and difficult to navigate than ever before. In fact, some families hire advisors to help their children chart a path to the most prestigious schools when they are barely teenagers. This text examines the historical college admissions process and where we are today through the thoughtful analysis of researchers, politicians, officials, and ordinary people in order to show students all sides of this often high-stress topic.
