Encyclopedia of African Airlines Nov 10 2020 The rainy season, terrain, and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa. This lack of modern infrastructure has been overcome in some part by the development of air transportation. Hundreds of carriers—both small and large, government owned and private—have connected all parts of the continent. Together, they have had a tremendous impact on the African economy and the people. Country-by-country, this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations. Each entry has the years of operation of the carrier, along with information on its origin, growth, and route structure. Aircraft usage, including registration numbers and nicknames, is covered in many cases. Any crashes involving aircraft in the carrier's fleet are also noted. An appendix gives the location of all major African airports.

A Compendium of Armaments and Military Hardware (Routledge Revivals) Mar 03 2020 First published in 1987, The Compendium of Armaments and Military Hardware provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

The Military Balance 2009 Jan 31 2020 The Military Balance is The International Institute for Strategic Studies' annual assessment of the military capabilities and defence economics of 170 countries worldwide. It is an essential resource for those involved in security policymaking, analysis and research. The book is a region-by-region analysis of the major military and economic developments affecting defence and security policies, and the trade in weapons and other military equipment. Comprehensive tables detail major military training activities, UN and non-UN deployments, and give data on key equipment holdings and defence-expenditure trends over a ten year period. Key Features: Region-by-region analysis: major military issues affecting each region, changes in defence economics, weapons and other military equipment holdings and the trade in weapons and military equipment. Comprehensive tables: key data on weapons and defence economics, such as comparisons of international defence expenditure and military manpower. Analysis: significant military and economic developments. Wallchart: detailed world map that shows current areas of conflict, with explanatory tables. This new edition of The Military Balance provides a unique compilation of data and information enabling the reader to access all required information from one single publication.
