Serviceology for Services Sep 19 2021 Services are key activities in the globalization of the economy and also underlie the quality of life of local residents. The advanced work presented in this book was selected from the proceedings of the First International Conference on Serviceology (ICServ2013), held October 16-18, 2013 in Tokyo. This book provides a useful overall guide to the state of the art in theory and practice of services for researchers in various fields, including engineering, marketing, economics, and others. This work also facilitates the scientific systematization of services and promotes technological developments for solutions of industrial issues.

Flexible Working Mar 26 2022 Mobile working and remote working from home or a small office, using phone, PC, fax and narrowband Internet is a rapidly increasing practice. The many well-documented benefits of working this way include higher productivity, more time

spent with the family and local community and less time wasted commuting. At a community level they include benefits to the environment through substituting physical transport by telecommunications, and re-vitalisation of rural communities. Yet, people who work mainly this way face severe problems: a loss of contact with the office grapevine, the out of sight, out of mind syndrome, and exclusion from vital ad-hoc meetings and tutorials. Another major problem is slow speed of communication. This volume summarizes how technologies can revolutionise flexible working practices and go a long way towards solving the isolation problems of flexible workers.

[Handbook of Integrated Risk Management for E-Business](#) Mar 14 2021

"This book provides a recipe for the practical application of technology and is one of the first instances where the tools and technologies that allow for the implementation of solutions to solve specific problems are actually outlined." --Dr. Krishna Nathan, Vice President, IBM Research This ground-breaking book integrates converging views of e-business processes and offers ways to manage their inherent risks with advanced modeling techniques. Contributors from leading

academic and business organizations explore state-of-the-art adaptive risk analysis systems that support business processes in project portfolio management, operations management, supply chain management, inventory control, data mining for customer relationship management, information technology security, finance, e-banking, and more. Today's new business environments are characterized by increasing sources of uncertainty and variability which challenge current decision-making processes. Handbook of Integrated Risk Management for E-Business: Measuring, Modeling, and Managing Risk provides a roadmap for identifying and mitigating the primary risks associated with each critical e-business process. It also shows you how to transform your processes by empowering your decision-making systems and how to design appropriate risk management systems for decision support.

[Service Business Model Innovation in Healthcare and Hospital Management](#) Nov 21 2021 This book demonstrates how to successfully manage and lead healthcare institutions by employing the logic of business model innovation to gain competitive advantages. Since clerk-like routines in professional organizations tend to overlook patient and service-centered healthcare solutions, it challenges the view that competition and collaboration in the healthcare sector should not only incorporate single-end services, therapies or diagnosis related groups. Moreover, the authors focus on holistic business models, which place greater emphasis on customer needs and put customers and patients first. The holistic business models approach addresses topics such as business operations, competitiveness, strategic business objectives, opportunities and threats, critical success factors and key performance indicators. The contributions cover various aspects of service business innovation such as reconfiguring the hospital business model in healthcare delivery, essential characteristics of service business model innovation in healthcare, guided business modeling and analysis for business professionals, patient-driven service delivery models in healthcare, and continuous and co-creative business model creation. All of the contributions introduce business models and strategies, process innovations, and toolkits that can be applied at the managerial level, ensuring the book will be of interest to healthcare professionals, hospital managers and consultants, as well as scholars, whose focus is on improving value-generating and competitive business architectures in the healthcare sector.

Cultural Heritage and Value Creation Jan 12 2021 Informed by systems thinking, this book explores new perspectives in which culture and management are harmoniously integrated and cultural heritage is interpreted both as an essential part of the social and economic context and as an expression of community identity. The combination of a multidisciplinary approach, methodological rigor and reference to robust empirical findings in the fertile field of analysis of UNESCO's contribution mean that the book can be considered a reference for the management of cultural heritage. It casts new light on the complex relation of culture and management, which has long occupied both scholars and practitioners and should enable the development of new pathways for value creation. The book is based on research conducted within the framework of the Consorzio Universitario di Economia Industriale e Manageriale (University Consortium for Industrial and Managerial Economics), a network of universities, businesses and public and private institutions that is dedicated to the production and dissemination of knowledge in the field. This volume will be of interest to all who are involved in the study and management of the cultural heritage.

Quick Hits for Service-Learning May 04 2020 Service-learning, the integration of classroom instruction with community service projects, is rapidly gaining momentum as a successful teaching and learning strategy that benefits both students and their communities. Quick Hits for Service-Learning presents more than 80 examples of innovative curricula, developed by educators in a wide range of disciplines, designed to combine community service with instruction and reflection. Seven chapters offer tips for classroom activities that focus on the education of children and youth; civic awareness, engagement, and activism; language, literature, and communication; global studies and local outreach to exceptional populations; the study of history, the social sciences, and the arts; business, industry, and the health

sciences; and the teaching of research and other "tools of the trade." Brimming with ideas that busy faculty members can easily adapt to their own classrooms, this book is a valuable reference for faculty new to the field or seasoned practitioners looking for fresh ideas.

The SAGE Handbook of Service-Dominant Logic May 16 2021 Service-Dominant Logic presents a major paradigm shift in thinking about value creation and markets, moving from a 'goods/product' logic to a logic that treats the process of service provision as the basis of all exchange, both commercial and social. This timely Handbook brings together chapters written by a stellar cast of expert authors from around the globe, arranged around eleven core themes, to provide a comprehensive overview of key issues, developments, debates and potential future directions for this dynamic field of study: Part 1: Introduction and Background Part 2: Value Cocreation Part 3: Service Exchange Part 4: Service Ecosystems Part 5: Institutions and Institutional Arrangements Part 6: Resources and Resource Integration Part 7: Actors and Practices Part 8: Innovation Part 9: Midrange Theory Part 10: Selected Applications Part 11: Reflections and Prospects This Handbook is an essential reference text for scholars, students, consultants and advanced practitioners across a wide range of business & management practices and academic disciplines.

E-commerce Jul 26 2019 E-commerce provides immense capability for connectivity through buying and selling activities all over the world. During the last two decades new concepts of business have evolved due to popularity of the Internet, providing new business opportunities for commercial organisations and they are being further influenced by user activities of newer applications of the Internet. Business transactions are made possible through a combination of secure data processing, networking technologies and interactivity functions. Business models are also subjected to continuous external forces of technological evolution, innovative solutions derived through competition, creation of legal boundaries through legislation and social change. The main purpose of this book is to provide the reader with a familiarity of the web based e-commerce environment and position them to deal confidently with a competitive global business environment. The book contains a numbers of case studies providing the reader with different perspectives in interface design, technology usage, quality measurement and performance aspects of developing web-based e-commerce.
